There remains a well documented lack of theologically sound Bible centric preaching in Sub Saharan Africa The majority of sermons are preached by untrained or undertrained church leaders Following a practical theology praxis this book develops a conceptual framework for the evaluation of existing alternative approaches to grassroots preacher training It also proposes broad principles for effective preacher training and offers a practical solution The 20th century had seen the Christian church in Africa grow 36 fold to 360 million This amazing growth is arguably the largest religious change in human history in such a short period It has shifted the focus of Christianity from North to South This rapid growth is debatably considered by some missiologists and theologians to have resulted in an African church a mile wide and an inch deep That is a church of great size but lacking in spiritual depth The rapid growth has led to insufficient numbers of trained leaders being available to oversee their congregations Most leaders are unpaid Untrained or undertrained leaders have an inadequate knowledge of scripture and lack understanding of its interpretation They also lack the skills they need to communicate its truths Even so they preach up to 90% of the sermons in rural Africa Despite a tremendous hunger for training among many of those preachers traditional college based theological education cannot keep up with the demand for trained pastors and preachers in an affordable or culturally appropriate manner **EBOOK: Social Research** Tim May, 2011-03-16 This fully revised and updated popular text successfully bridges the gap between theory and methods in social research clearly illuminating these essential components for understanding the dynamics of social relations The book is divided into two parts with part one

examining the issues and perspectives in social research and part two setting out the methods and processes Updates to this edition include A new chapter on case study research A new concluding chapter Links to additional websites and IT applications that are integrated throughout the book Updated experiential examples and scenarios More international examples The clear writing style chapter summaries questions for reflection and signposts to further readings continue to make this book the ideal companion to social research for students across the social sciences In addition it will be recognised as an invaluable source of reference for those practising and teaching social research who wish to keep abreast of key developments in the field With contributions from Beth Perry University of Salford and Carole Sutton University of Plymouth
