in the social sciences Told chronologically and in a first person voice the narratives position the reader alongside the narrator so as to vicariously experience how research happens in its situated particulars Rather than a set of idealizations and universalized pronouncements the author reveals what really goes on when one is in the thick of complex and challenging research studies the points of trouble along with the successes This will be relevant to researchers who have already undertaken one or more empirical research studies though not necessarily using qualitative approaches and now find themselves facing something new a new analytic method a new theoretical lens a new form of data collection a new domain of research questions a new rhetorical approach This requires letting go of the secure handholds of prescribed methods and responding to the contingencies that arise in the midst of the research The reader is invited to follow along as the author makes visible his praxis of qualitative research Unlike more conventional texts in this unique alternative the reader can follow the author's journey through his research studies as a way to reorient their conception of qualitative research and their own praxis of it This is fascinating reading for qualitative researchers and students taking qualitative research courses across the social sciences education and behavioural sciences

#### **Design Thinking Research** Hasso Plattner, Christoph

Meinel, Larry Leifer, 2015-09-08 This book summarizes the results of Design Thinking Research carried out at Stanford University in Palo Alto California USA and Hasso Plattner Institute in Potsdam Germany The authors offer readers a closer look at Design Thinking with its processes of innovations and methods The contents of the articles range from how to design ideas methods and technologies via creativity experiments and wicked problem solutions to creative collaboration in the real world and the connectivity of designers and engineers But the topics go beyond this in their detailed exploration of design thinking and its use in IT systems engineering fields and even from a management perspective The authors show how these methods and strategies work in companies introduce new technologies and their functions and demonstrate how Design Thinking can influence as diverse a topic area as marriage Furthermore we see how special design thinking use functions in solving wicked problems in complex fields Thinking and creating innovations are basically and inherently human so is Design Thinking Due to this Design Thinking is not only a factual matter or a result of special courses nor of being gifted or trained it is a way of dealing with our environment and improving techniques technologies and life
