Hardin, Gilbert B. Rodman, Jennifer Daryl Slack, 2025-09-10 Better Stories assembles essays and provocations in honor of Lawrence Grossberg's radically contextual and affectively attuned lifework. In over fifty chapters, contributors trace mattering maps of influence, friendship, and intellectual struggle, charged with the hope that thinking together with feeling can change the world. These essays not only comment on Grossberg's ideas and many published works but also engage, expand, confront, and reshape them. Here, cultural studies is not a settled field but an unruly and ongoing conversation, an affective and political project sustained through convivial agonism, where asking so what sparks new thinking and even better stories. Cracking the Code Thom Hartmann, 2008-09-02 By the bestselling author and XM and Sirius Satellite radio host heard on more than eighty radio stations coast to coast seven days a week. Shows progressives how to master the science and technology of persuasive communication and counter the right-wing message machine. Offers exercises and examples throughout to help readers put the concepts they're learning into practice. Millions of working Americans talk, act, and vote as if their economic interests match those of the megawealthy, the multinational corporations, and the politicians who do their bidding. How did this happen? According to Air America radio host Thom Hartmann, the apologists of the Right have become masters of the subtle and largely subconscious aspects of political communication. It's not an escalation in Iraq; it's a surge; it's not the inheritance tax; it's the death tax; it's not drilling for oil; it's exploring for energy. Conservatives didn't intuit the path to persuasive messaging; they learned these techniques. There is no reason why progressives can't learn them too. In *Cracking the Code*, Hartmann shows you how. Drawing on his background as a psychotherapist and advertising executive as well as a national radio host, he breaks down the science and technology of effective communication so you can apply it to your own efforts to counter right-wing disinformation. It's both an art and a science, as Hartmann explains: political persuasion is as much about biology as ideology, about knowing how the brain processes information and how that influences the way people perceive messages, make decisions, and form a worldview. Throughout the book, Hartmann shows you precisely how to master this technology, providing examples dating back to the time of the Founding Fathers. As you read deeply in this book, you'll see things you hadn't realized were there in everything.

from advertising to political rants and discover abilities you didn't know you had Whether you're a politician an activist a volunteer or a concerned citizen you'll develop a strong sense for how to reach into that part of the collective human psyche where we truly do have the power to create a new world Cracking the Code (EasyRead Large Bold Edition) Thom Hartmann, 2007 Cracking the Code (EasyRead Super Large 20pt Edition), Spectrum Reading, Grade 6, 2025-05-13

Virtue and Venom Glenda McLeod, 2025-10-01 *Virtue and Venom* traces the history of a previously neglected genre the catalog of women from its origins in Greece and Rome to the late Middle Ages revealing the catalogs considerable importance as cultural documents of the evolution of the Western definition of womankind These catalogs were simple

listings of past heroines sometimes described in extended biographies sometimes merely enumerated by name Catalog heroines often appeared in familiar guises anonymous mothers of great men fascinating seductresses self effacing spouses abused victims of love strong and brilliant achievers Written by some of the finest authors of the ages the catalogs fulfilled important functions By defining women typologically they instilled stereotypes in the popular mind and by illustrating proper and improper feminine conduct they reinforced the late medieval link between literature and ethics Despite the repetitive form of the genre the catalogs were extremely flexible able to illustrate different even antithetical views of femininity invoking the past as authority or reinterpreting the past in an attempt to associate femininity with changing cultural values Thus as well as being the vehicle for the transmission of knowledge the form could also be manipulated to contest authority in the guise of invoking it and present new paradigms McLeod examines a host of catalogs including those of Homer Hesiod Vergil Ovid Juvenal Plutarch St Jerome and Jean de Meun but gives special attention to Boccaccio's *De claris mulieribus* and Chaucer's *Legend of Good Women* She then shows how the tradition ultimately produced the first major defense of womankind in Christine de Pizan's *Cité des Dames* This book will be of interest to classicists medievalists Renaissance and feminist scholars and anyone interested in the misogynist tradition in the West and the response it engendered *Maps, Myths, and Men* Kirsten A. Seaver, 2004 The Vinland Map first surfaced on the antiquarian market in 1957 and the map's authenticity has been hotly debated ever since in controversies ranging from the anomalous composition of the ink and the map's lack of provenance to a plethora of historical and cartographical riddles *Maps Myths and Men* is the first work to address the full range of this debate Focusing closely on what the map in fact shows the book contains a critique of the 1965 work *The Vinland Map and the Tartar Relation* scrutinizes the marketing strategies used in 1957 and covers many aspects of the map that demonstrate it is a modern fake such as literary evidence and several scientific ink analyses performed between 1967 and 2002 The author explains a number of the riddles and provides evidence for both the identity of the mapmaker and the source of the parchment used and she applies current knowledge of medieval Norse culture and exploration to counter widespread misinformation about Norse voyages to North America and about the Norse world picture *The Nowhere Bible* Frauke Uhlenbruch, 2015-03-10 The Bible contains passages that allow both scholars and believers to project their hopes and fears onto ever changing empirical realities By reading specific biblical passages as utopia and dystopia this volume raises questions about reconstructing the past the impact of wishful imagination on reality and the hermeneutic implications of dealing with utopia good place yet no place as a method and a concept in biblical studies A believer like William Bradford might approach a biblical passage as utopia by reading it as instructions for bringing about a significantly changed society in reality even at the cost of becoming an oppressor A contemporary biblical scholar might approach the same passage with the ambition of locating the historical reality behind it finding the places it describes on a map or arriving at a conclusion about the social reality experienced by a historical community of redactors These utopian goals are projected onto a utopian text

This volume advocates an honest hermeneutical approach to the question of how reliably a past reality can be reconstructed from a biblical passage and it aims to provide an example of disclosing not obscuring pre suppositions brought to the text
