## **Iata Airport Requirements Reference Manual:**

**Airport Passenger Terminal Planning and Design** Landrum & Brown, 2010 TRB's Airport Cooperative Research Program ACRP Report 25 Airport Passenger Terminal Planning and Design comprises a guidebook spreadsheet models and a user's guide in two volumes and a CD ROM intended to provide guidance in planning and developing airport passenger terminals and to assist users in analyzing common issues related to airport terminal planning and design Volume 1 of ACRP Report 25 explores the passenger terminal planning process and provides in a single reference document the important criteria and requirements needed to help address emerging trends and develop potential solutions for airport passenger terminals Volume 1 addresses the airside terminal building and landside components of the terminal complex Volume 2 of ACRP Report 25 consists of a CD ROM containing 11 spreadsheet models which include practical learning exercises and several airport specific sample data sets to assist users in determining appropriate model inputs for their situations and a user's guide to assist the user in the correct use of each model The models on the CD ROM include such aspects of terminal planning as design hour determination gate demand check in and passenger and baggage screening which require complex analyses to support planning decisions The CD ROM is also available for download from TRB's website as an ISO image

**Handbook of Checked Baggage Screening** Norman E. L. Shanks, Alexandre L. W. Bradley, 2005-08-19 Handbook of Checked Baggage Screening Advanced Airport Security Operation is a practical guide for project managers and designers embarking on hold baggage screening developments within the airport environment for the first time The book clearly explains away any uncertainty about the processes and procedures to be used by the various parties involved within the industry and sets out best practice with respect to checked baggage screening design Valuable lessons can be learned from actual case studies contributed by leading equipment manufacturers on recent 100% hold baggage screening projects In addition to the all important security screening of baggage and passengers the book also looks at the following areas associated with airport security through the use of a detailed structured security check list evaluation questionnaire The questionnaire allows airports to assess the state of readiness of their airports and then using the other chapters gain an insight regarding which technology will best solve any security gaps The authors offer a unique perspective through their background and experience Many of the checked baggage screening procedures and equipment discussed in the book have already been implemented in the UK with the authors responsible for leading this effort The combined experience they can offer to the industry world wide is invaluable

**Civil Engineer's Reference Book** L S Blake, 1994-03-21 After an examination of fundamental theories as applied to civil engineering authoritative coverage is included on design practice for certain materials and specific structures and applications A particular feature is the incorporation of chapters on construction and site practice including contract management and control

**Reference Guide on Understanding Common Use at Airports** Rick Belliotti, 2010 The aviation industry has seen dramatic changes in the past two decades with

significant growth during the 1990s a significant industry disruptive event on September 11 2001 and an economic decline resulting in a sharp rise in fuel prices that has substantially changed the economics of airline operations and a decline in growth During this period airlines have adapted to the changes in various ways many of which have resulted in adaptability issues for airport operators thus raising the question of is there a better way to be more flexible and responsive to airline service changes in good and bad times From an airline perspective cost reduction since September 11 has been a prominent focus From an airport operator perspective adapting to and accommodating changing flight services by incumbent carriers as well as new entrant services has been a key focus In recent years offering more cost effective solutions to retain or encourage new services in the face of service reductions has become a key focus Airport operator interests in common use have been heightened by the potential for achieving a reasonable balance between airline and airport operator interests The implications of transitioning from a traditional model of airline facility use and leasing focused on dedicated facilities to common use has elicited varying and often conflicting perceptions of benefit and cost

**Resource Manual for Airport In-terminal Concessions** ,2011 TRB s Airport Cooperative Research Program ACRP Report 54 Resource Manual for Airport In Terminal Concessions provides guidance on the development and implementation of airport concession programs The report includes information on the airport concession process concession goals potential customers developing a concession space plan and concession mix the Airport Concessions Disadvantaged Business Enterprise ACDBE program and concession procurement contracting and management practices Publisher s description
