LIZARD EVOLUTION VIRTUAL LAB

QUESTIONS TO ANSWER AFTER COMPLETING THE LIZARD EVOLUTION LAB

Answer the following questions as you finish each scenario at the virtual lab.

Scenario 1: Divergence

1. As the lizards of different color and size were isolated over eight weeks and generations, what major evolutionary process was taking place? (What did the lizards have in common when they started?)

Initially, they had to grow from the same egg.

Because they started to grow from the same egg, initially they had the same DNA. As time passed, the DNA began to change, and the lizards began to evolve.

2. An adaptation is a trait that is inherited that is beneficial to an organism's survival. Give an example of an adaptation of the lizards in the virtual lab.

Example: large, thick skin and scales, which protect them from predators.

Example: I think that the lizards were getting bigger and bigger, and were getting stronger.

3. Explain why the lizards of different color and size were isolated at the virtual lab.

They were isolated because the lizards of different color and size were isolated at the virtual lab.

4. Explain why the lizards of different color and size were isolated at the virtual lab.

Because the lizards of different color and size were isolated at the virtual lab, they were isolated from the other lizards.
