The scope of the conference encompassed the theory and practice of all aspects of information retrieval in text, audio, image, video, and multimedia data. AIRS 2010 continued the conference series that grew from the Information Retrieval with Asian Languages IRAL workshop series started in 1996. It has become a mature venue for information retrieval work, finding support from the ACM Special Interest Group on Information Retrieval SIGIR, the Association for Computational Linguistics and Chinese Language Processing ACLCLP, ROCLING, and the Information Processing Society of Japan Special Interest Group on Information Fundamentals and Access Technologies IPSJSIG IFAT. This year saw a sharp rise in the number of submissions over the previous year. A total of 120 papers were submitted representing work by academics and practitioners not only from Asia but also from Australia, Europe, North America, etc. The high quality of the work made it difficult for the dedicated program committee to decide which papers to feature at the conference.

Through a double blind reviewing process 26 submissions 21% were accepted as full oral papers and 31 25% were accepted as short posters The success of this conference was only possible with the support of all of the authors who submitted papers for review the program committee members who constructively assessed the submissions and the registered conference delegates We thank them for their support of this conference and for their long term support of this Asian centric venue for IR research and development Information Retrieval Technology Buren Zheng, 2010 The Asia Information Retrieval Societies

**The American Short-hand Writer** ,1884 **Masculinities, Sexualities and Child Sexual Abuse** Anne Cossins,2021-08-04 Why is child sexual abuse committed primarily by men and male adolescents unlike other forms of child abuse Is child sex offending rather than being a deviant masculine sexual practice related to normative masculine

practices that is practices structured on dynamic and changing relations of power Using a practice based sociological approach the relationship between masculinities sexualities and child sexual abuse is analysed and the power powerlessness theory is developed to explain the predominantly male problem of child sex offending The theory postulates that because the social construction of masculinities involves the construction of dynamic and changing relations of power between men men s lives are characterised by a combination of power and powerlessness The book argues that an offender s experiences of powerlessness as a result of his relationships with other men is the key to understanding child sex offending since sexuality is a key social practice for the alleviation of experiences of powerlessness and for establishing relations of power with other men In particular the theory argues that a man s particular attachment to the link between sexuality and experiences of masculinity and power will be a key factor for determining how he does sex and whom he chooses as a sexual partner In the final chapter the theory is tested through a re analysis of offender interviews

Towards a Theory of Spacetime Theories Dennis Lehmkuhl,Gregor Schiemann,Erhard Scholz,2017-01-05 This contributed volume is the result of a July 2010 workshop at the University of Wuppertal Interdisciplinary Centre for Science and Technology Studies which brought together world wide experts from physics philosophy and history in order to address a set of questions first posed in the 1950s How do we compare spacetime theories How do we judge objectively which is the best theory Is there even a unique answer to this question The goal of the workshop and of this book is to contribute to the development of a meta theory of spacetime theories Such a meta theory would reveal insights about specific spacetime theories by distilling their essential similarities and differences deliver a framework for a class of theories that could be helpful as a blueprint to build other meta theories and provide a higher level viewpoint for judging which theory most accurately describes nature But rather than drawing a map in broad strokes the focus is on particularly rich regions in the space of spacetime theories This work will be of interest to physicists as well as philosophers and historians of science working with or interested in General Relativity and or Space Time and Gravitation more generally
