of this paper concentrates on different approaches that try to turn unprofitable customer relationships into profitable ones. Some of the approaches focus on letting the customer take over more of the value chain activities such as self service. Other approaches look more at the non monetary value a customer can provide such as positive word of mouth. Examples from business to business B2B and business to consumer B2C markets are given for each approach and discussed in detail. The paper concludes with ideas for future research and a discussion. It emphasizes that companies need to realize that every customer is an asset that contributes to the value of a firm. However customers differ in their needs and a company has to tailor its offering to meet these needs. Only when a company takes a more customer centric view can it be successful especially in mature markets.
