 155-MM Howitzer Carriage M1: Technical Manual* War Department, 2013-05-01 The 155 mm Howitzer M1 was first produced
 in 1942 as a medium artillery piece It saw service with the US Army during World War II the Korean War and the Vietnam
 War before being replaced by the M198 Howitzer The gun was used by the armed forces of many nations and in some
 countries it still remains in service The 155 mm Howitzer was developed as an afterthought A new carriage was under
 development for much of the 1930s for the existing World War I era M1918 until 1939 when it was realized that it did not
 seem logical to put a new carriage underneath an obsolete howitzer Consequently development began anew with a carriage
 designed to be used for the 155 mm Howitzer This was completed by May 15th 1941 when the Howitzer M1 on the Carriage
 M1 was standardized The howitzer itself differed from the older model by a lengthened barrel of twenty calibers and a new
 breech mechanism Uniquely it was the sole slow cone interrupted screw mechanism to enter service after 1920 This meant
 that two separate movements were necessary to open the breech versus the single movement of the steep cone mechanism
 that simultaneously rotated and withdrew the breech Created in 1943 this technical manual reveals a great deal about the
 155 mm Howitzer M1 s design and capabilities Intended as a manual for those charged with operation and maintenance it
 details many aspects of its assembly ammunition and accessories Originally labeled restricted this manual was declassified
