Weapons Systems Directorate,1972 Operator's Manual ,1991 **FM 6-81 155-MM Howitzer M1 Field Manual**
Department of the Army,2013-06 The 155 mm Howitzer M1 was first produced in 1942 as a medium artillery piece It saw
service with the US Army during World War II the Korean War and the Vietnam War before being replaced by the M198
Howitzer The gun was used by the armed forces of many nations and in some countries it still remains in service The 155 mm
Howitzer was developed as an afterthought A new carriage was under development for much of the 1930s for the existing
World War I era M1918 until 1939 when it was realized that it did not seem logical to put a new carriage underneath an
obsolete howitzer Consequently development began anew with a carriage designed to be used for the 155 mm Howitzer This
was completed by May 15th 1941 when the Howitzer M1 on the Carriage M1 was standardized The howitzer itself differed
from the older model by a lengthened barrel of twenty calibers and a new breech mechanism Uniquely it was the sole slow
cone interrupted screw mechanism to enter service after 1920 This meant that two separate movements were necessary to
open the breech versus the single movement of the steep cone mechanism that simultaneously rotated and withdrew the
breech Created in 1948 this field manual reveals a great deal about the 155 mm Howitzer M1 s design and capabilities
Intended as a manual for those in the service of the piece it details many aspects of the M1 s assembly maintenance and
accessories Originally labeled restricted this manual was declassified long ago and is here reprinted in book form Care has
been taken to preserve the integrity of the text **Field Artillery Individual and Unit Training Standards, November**
