**2021: One World, One Health — Global Partnership for Digital Innovation** P. Otero, P. Scott, S.Z. Martin, 2022-08-05

The World Health Organization defines health as a state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity and its constitution also asserts that health for all people is dependent on the fullest co-operation of individuals and States. The ongoing pandemic has highlighted the power of both healthy and unhealthy information so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge, social media has shown how unhealthy misinformation can be spread and amplified, reinforcing existing prejudices, conspiracy theories, and political biases. This book presents the proceedings of MedInfo 2021, the 18th World Congress of Medical and Health Informatics, held as a virtual event from 2-4 October 2021 with pre-recorded presentations for all accepted submissions. The theme of the conference was One World One Health Global Partnership for Digital Innovation and submissions were requested under 5 themes: information and knowledge management, quality, safety, and outcomes, health data science, human, organizational, and social aspects, and global health informatics. The Programme Committee received 352 submissions from 41 countries across all IMIA regions and 147 full papers, 60 student papers, and 79 posters were accepted for presentation after review and are included in these proceedings. Providing an overview of current work in the field over a wide range of disciplines, the book will be of interest to all those whose work involves some aspect of medical or health informatics.
