Travellers, Intellectuals, and the World Beyond Medieval Europe James Muldoon, 2017-05-15 As the articles reprinted in this volume demonstrate medieval men and women were curious about the world around them They wanted to hear about distant lands and the various peoples who inhabited them Travellers tales factual such as that of Marco Polo and fictional such as Chaucer's famous pilgrimage entertained audiences across Europe Colorful mappamundi placed in churches illustrated these other lands and peoples for those who could not read Medieval travel literature was not only entertaining however it was also informative generating proto ethnological information about the world beyond Latin Christendom that provided useful guidance for those such as merchants and missionaries who intended to travel abroad Merchants learned about safe travel routes to foreign lands about dangers to be avoided on the roads and at sea about cultural practices that might interfere with their attempts at trade and about products that would be suitable for foreign markets Churchmen read the reports of missionaries to understand the

beliefs of Muslims and other non believers in order to debate with them and to learn their languages These articles illustrate how travellers reports in turn shaped the European response to the world beyond Europe and are set in context in the editor's introduction Medieval Europe and the World Beyond Gloria K. LeVasseur,2005 *Robert Grosseteste and the pursuit of Religious and Scientific Learning in the Middle Ages* Jack P. Cunningham,Mark Hocknull,2016-08-29 This book explores a wide range of topics relating to scientific and religious learning in the work of Bishop Robert Grosseteste c 1168 1253 and does so from various perspectives including those of a twenty first century scientists historians and philosophers as well as several medievalists In particular it aims to contribute to our understanding of where to place Grosseteste in the history of science against the background of the famous claim by A C Crombie that Grosseteste introduced what we now might call experimental science and to demonstrate that the polymathic world of the medieval scholar who recognized no dichotomy in the pursuit of scientific and philosophical theological understanding has much to teach those of us in the modern world who wrestle with the vexed question of the relationship between science and religion The book comprises an edited selection of the best papers presented at the 3rd International Robert Grosseteste Conference 2014 on the theme of scientific and religious learning especially in the work of Grosseteste

Spain and Its World, 1500-1700 John Huxtable Elliott,1989-01-01 It used to be said that the sun never set on the empire of the King of Spain It was therefore appropriate that Emperor Charles V should have commissioned from Battista Agnese in 1543 a world map as a birthday present for his sixteen year old son the future Philip II This was the world as Charles V and his successors of the House of Austria knew it a world crossed by the golden path of the treasure fleets that

linked Spain to the riches of the Indies It is this world with Spain at its center that forms the subject of this book J H Elliott the pre eminent historian of early modern Spain and its world originally published these essays in a variety of books and journals They have here been grouped into four sections each with an introduction outlining the circumstances in which they were written and offering additional reflections The first section on the American world explores the links between Spain and its American possessions The second section The European World extends beyond the Castilian center of the Iberian peninsula and its Catalan periphery to embrace sixteenth and seventeenth century Europe as a whole In The World of the Court the author looks at the character of the court of the Spanish Habsburgs and the perennially uneasy relationship between the world of political power and the world of arts and letters The final section is devoted to the great historical question of the decline of Spain a question that continues to resonate in the Anglo American world of today **Bullion**

Flows and Monetary Policies in England and the Low Countries, 1350-1500 John H. Munro, 2024-10-28 Did money matter in the economic history of medieval Europe In these essays John Munro has pursued the controversies surrounding the monetary not monetarist history of the period specifically in relation to England and Flanders and the other Burgundian Low Countries during the late Middle Ages He argues that without doubt monetary factors and policies were crucial and attempts to integrate them with other factors themselves often of equal significance such as demographic change or institutional controls The focus is upon the international flow of precious metals through the region and various related economic themes the so called late medieval bullion famine the relation between monetary and price changes the role of coinage in financing warfare bullionist mint policies as both fiscal and monetary remedies for perceived economic political and military problems and the consequences of warfare war financing monetary policies and related monetary problems for the two countries commerce finance and industries especially those involving woollen textiles Quelle tait la v ritable importance de l argent dans l histoire mon taire et conomique de l Europe du Moyen Age Au travers de ce volume John Munro poursuit les controverses de cette p riode plus sp cifiquement se rapportant l Angleterre et aux Flandres ainsi qu aux autres Pays Bas Bourguignons vers la fin du Moyen Age Il affirme que la politique et les facteurs mon taires taient sans aucun doute d une importance vitale et tente de les int ger d autres param tres tout aussi significants tels le changement d mographique et les controles institutionnels L accent est mis sur la circulation internationale de m taux pr cieux dans toute la r gion ainsi que sur divers th mes s y rattachant la soit disante famine d or du Bas Moyen Age le rapport entre changements mon taires et changements de prix le r le de la fra **History of Modern Europe** Ferdinand Schevill, 1898 *God and*

Reason in the Middle Ages Edward Grant, 2001-07-30 Between 1100 and 1600 the emphasis on reason in the learning and intellectual life of Western Europe became more pervasive and widespread than ever before in the history of human civilization Of crucial significance was the invention of the university around 1200 within which reason was institutionalized and where it became a deeply embedded permanent feature of Western thought and culture It is therefore appropriate to

speak of an Age of Reason in the Middle Ages and to view it as a forerunner and herald of the Age of Reason that was to come in the seventeenth century The object of this study is twofold to describe how reason was manifested in the curriculum of medieval universities especially in the subjects of logic natural philosophy and theology and to explain how the Middle Ages acquired an undeserved reputation as an age of superstition barbarism and unreason **Towards a just Europe** João Labareda,2021-01-26 This highly original book constitutes one of the first attempts to examine the problem of distributive justice in the European Union in a systematic manner Jo o Labareda argues that the set of shared political institutions at EU level including the European Parliament and the Court of Justice of the EU generate democratic duties of redistribution among EU citizens Furthermore the economic structure of the EU comprising a common market a common currency and a free movement area triggers duties of reciprocity among member states The responsibilities to fulfil these duties Labareda argues should be shared by the local national and supranational levels of government Not only should the EU act as a safety net to the national welfare systems applying the principle of subsidiarity but common market and Eurozone regulations should balance their efficiency targets with fair cooperation terms The concrete policy proposals presented in this book include a threshold of basic goods for all EU citizens an EU labour code a minimum EU corporate tax rate and an EU fund for competitiveness Labarada argues that his proposals match the political culture of the member states are economically feasible can be translated into functioning institutions and policies and are consistent with the limited degree of social solidarity in Europe This book is a major contribution to the understanding of what a just Europe would look like and what it might take to get us there Rulers and Rulership in the Arc of Medieval Europe, 1000-1200 Christian Raffensperger,2023-08-24 Rulers and Rulership in the Arc of Medieval Europe challenges the dominant paradigm of what rulership is and who rulers are by decentering the narrative and providing a broad swath of examples from throughout medieval Europe Within that territory the prevalent idea of monarchy and kingship is overturned in favor of a broad definition of rulership This book will demonstrate to the reader that the way in which medieval Europe has been constructed in both the popular and scholarly imaginations is incorrect Instead of a king we have multiple rulers male and female ruling concurrently Instead of an independent church or a church striving for supremacy under the Gregorian Reform we have a pope and ecclesiastical leaders making deals with secular rulers and an in depth interconnection between the two Finally instead of a strong centralizing polity growing into statehood we see weak rulers working hand in glove with weak subordinates to make the polity as a whole function Medievalists Byzantinists and Slavists typically operate in isolation from one another They do not read each other s books or engage with each other s work This book requires engagement from all of them to point out that the medieval Europe that they work in is one and the same and demands collaboration to best understand it **Bridging the Medieval-Modern Divide** James Muldoon,2016-04-15 The debate about when the middle ages ended and the modern era began has long been a staple of the historical literature In order to further this debate and

illuminate the implications of a longue dure approach to the history of the Reformation this collection offers a selection of essays that address the medieval modern divide Covering a broad range of topics encompassing legal social cultural theological and political history the volume asks fundamental questions about how we regard history and what historians can learn from colleagues working in other fields that may not at first glance appear to offer any obvious links By focussing on the concept of the medieval modern divide in particular the relation between the Middle Ages and the Reformation each essay examines how a medievalist deals with a specific topic or issue that is also attracting the attention of Reformation scholars In so doing it underlines the fact that both medievalists and modernists are often involved in bridging the medieval modern divide but are inclined to construct parallel bridges that end between the two starting points but do not necessarily meet As a result the volume challenges assumptions about the strict periodization of history and suggest that a more flexible approach will yield interesting historical insights
