Introduction to the Simulation of Dynamics Using Simulink Michael A. Gray, 2010-07-02 Designed for undergraduate students in the general science engineering and mathematics community Introduction to the Simulation of Dynamics Using Simulink R shows how to use the powerful tool of Simulink to investigate and form intuitions about the behavior of dynamical systems Requiring no prior programming experience it clearly explains how to transition from physical models described by mathematical equations directly to executable Simulink simulations Teaches students how to model and explore the dynamics of systems Step by step the author presents the basics of building a simulation in Simulink He begins with finite difference equations and simple discrete models such as annual population models to introduce the concept of state The text then covers ordinary differential equations numerical integration algorithms and time step simulation The final chapter offers overviews of some advanced topics including the simulation of chaotic dynamics and partial differential equations A one semester undergraduate course on simulation Written in an informal accessible style this guide includes many diagrams and graphics as well as exercises embedded within the text It also draws on numerous examples from the science engineering and technology fields The book deepens students understanding of simulated systems and prepares them for advanced and specialized studies in simulation

Computational Modeling and Visualization of Physical Systems with Python Jay Wang, 2015-12-21 Computational Modeling by Jay Wang introduces computational modeling and visualization of physical systems that are commonly found in physics and related areas The authors begin with a framework that integrates model building algorithm development and data visualization for problem solving via scientific computing Through carefully

selected problems methods and projects the reader is guided to learning and discovery by actively doing rather than just knowing physics
