Language Acquisition And Language Socialization Ecological Perspectives:

Language Acquisition and Language Socialization Claire Kramsch, 2003-02-01 This is an outstanding collection of papers by top scholars in a range of disciplines who shed stimulating complementary insights into the social cognitive and semiotic frameworks that shape both the acquisition of language and the constitution of social actors through that process. The intentionally loose ecological framing of the volume provides an arena within which a range of perspectives all united by their opposition to a mechanistic view of language acquisition can enter into dialogue with each other. This is a most stimulating collection with a range of insightful investigations of settings as diverse as an autistic child learning to interact with others on the playing field, professional gate-keeping encounters and foreign language classrooms. Professor Charles Goodwin, University of California at Los Angeles. The book brings together well-known scholars in two relatively distinct fields: language acquisition and language socialization, and from a variety of orientations within applied linguistics to describe language development from a relational perspective. The papers in this volume are a response to three main questions: 1. What conceptual models best capture the ecological nature of language learning? 2. What research approaches are best likely to illuminate the relationship between language and social structure? 3. How is educational success defined for language acquisition and language socialization? Ecological Perspectives in Early Language Education Mila Schwartz, 2024-02-27

This book presents ecological perspectives towards early language education that conceptualise the phenomenon of interactions between child, language-based agency, teachers, agency peers, agency parents, agency consequently, furthering insights into the lives of young children growing up in multilingual homes. Drawing on rich empirical research evidence, the book explores teachers' and family strategies and practices aimed at enhancing children's interest in home language maintenance and enrichment as well as in the novel language learning. It defines early language education as the education of children up to the age of 6 and considers international evidence of children's language from diverse sociolinguistic backgrounds and indigenous endangered heritage, regional minority, majority and marginalized languages as well as foreign and second languages in education at home and out of home settings. It claims that only through collaboration between teachers, families, peers and close environment can the child be engaged in early language learning and fully experience his or her potential to act as agent in a novel language learning. The book will be of great interest to researchers, academics and postgraduate students in the fields of language education, multilingualism, applied linguistics and early childhood education. Practitioners in these fields may also find the volume a valuable resource. *Language Acquisition and Language Socialization* Claire Kramsch, 2002 This is an outstanding collection of papers by top scholars in a range of disciplines who shed stimulating complementary insights into the social cognitive and semiotic frameworks that shape both the acquisition of language and the constitution of social actors through that process. Mediating Discourse Online Sally Sieloff Magnan, 2008 Information and communication technology is transforming our notion of literacy In the study of second language learning there is an acute need to understand how learners collaborate in mediating discourse online This edited volume offers essays and research studies that lead us to question the borders between speech and writing to redefine narrative to speculate on the consequences of many to many communication and to ponder the ethics of researching online interaction Using diverse technologies bulletin boards course management systems chats instant messaging online gaming and situated in different cultural environments the studies explore intercultural notions of identity voice and collaboration Although the studies come from varying theoretical perspectives they point as a whole to insights to be gained from an ecological approach to studying how people make discourse online The volume will especially benefit researchers in the digital arena and instructors who must consider how online interaction affects language learning and use

Ecology of Language Acquisition J.H. Leather, Jet van Dam, 2013-03-09 While most research on language acquisition continues to consider the individual primarily in closed system terms Ecology of Language Acquisition emphasizes the emergence of linguistic development through children's and learners' interactions with their environment spatial social cultural educational and so on bringing to light commonalities between primary language development child and adult second language learning and language acquisition by robots Such a situated context responsive perspective on acquisition is able to interrelate insights from a variety of paradigms and disciplines while avoiding unjustifiable appeals to normativity The theoretical and empirical studies presented here challenge a number of dominant ideas in language acquisition theory and mark an important new research orientation This work should be of interest to language acquisition researchers and professionals in a wide range of specialisms

The Ecology and Semiotics of Language Learning Leo van Lier, 2006-04-18 In this book I try to give a coherent and consistent overview of what an ecological approach to language learning might look like This is not a fully fledged grand theory that aims to provide an explanation of everything but an attempt to provide a rationale for taking an ecological world view and applying it to language education which I regard as one of the most important of all human activities Goethe once said that everything has been thought of before but that the

difficulty is to think of it again The same certainly is true of the present effort If it has any innovative ideas to offer these lie in a novel combination of thoughts and ideas that have been around for a long long time The reader will encounter influences that range from Spinoza to Bakhtin and from Vygotsky to Halliday The scope of the work is intentionally broad covering all major themes that are part of the language learning process and the language teaching profession These themes include language perception and action self learning critical pedagogy and research At the same time I have attempted to look at both the macro and the micro sides of the ecological coin and address issues from both a theoretical and a practical perspective This then aims to be a book that can be read by practitioners and theoreticians alike and the main idea is that it should be readable and challenging at the same time
