

## Chapter 2. Hints and Homework Solutions

### Exercise 2.1 (page 70)

2.1 1. True

- a) We can take the sequence  $\{a_n\}$  to be  $\{1/n\}$  and  $\{b_n\}$  to be  $\{1/n^2\}$ . The given series then converges absolutely by the M-test.
- b) Suppose that  $\{a_n\}$  is chosen such as not to converge to the zero term, but that  $\{b_n\}$  is the constant function  $\{1/n^2\}$ .
- c) Consider  $\{a_n\} = 1/n$  and  $\{b_n\} = 1/n^2$ .  $\{a_n\}$  does not converge to zero, but  $\{b_n\}$  does, so  $\{a_n b_n\} = \{1/n^3\}$  converges to zero.

2.2 This procedure agrees with the second convergence criterion of convergence of the sequence of  $n$ -th partial sums  $\{s_n\}$  of  $\sum_{n=1}^{\infty} a_n$ . This gives the desired result.

### Exercise 2.2 (page 70)

2.2 (b) Let  $\{a_n\}$  be any series which does not converge to zero. This is clearly the false. They should converge to different results.

Robinson,1998-01-08 The Handbook of Logic in Artificial Intelligence and Logic Programming is a multi volume work covering all major areas of the application of logic to artificial intelligence and logic programming The authors are chosen on an international basis and are leaders in the fields covered Volume 5 is the last in this well regarded series Logic is now widely recognized as one of the foundational disciplines of computing It has found applications in virtually all aspects of the subject from software and hardware engineering to programming languages and artificial intelligence In response to the growing need for an in depth survey of these applications the Handbook of Logic in Artificial Intelligence and its companion the Handbook of Logic in Computer Science have been created The Handbooks are a combination of authoritative exposition comprehensive survey and fundamental research exploring the underlying themes in the various areas Some mathematical background is assumed and much of the material will be of interest to logicians and mathematicians Volume 5 focuses particularly on logic programming The chapters which in many cases are of monograph length and scope emphasize possible unifying themes

*Logical Dynamics of Information and Interaction* Johan van Benthem,2011-09-29 This book develops a view of logic as a theory of information driven agency and intelligent interaction between many agents with conversation argumentation and games as guiding examples It provides one uniform account of dynamic logics for acts of inference observation questions and communication that can handle both update of knowledge and revision of beliefs It then extends the dynamic style of analysis to include changing preferences and goals temporal processes group action and strategic interaction in games Throughout the book develops a mathematical theory unifying all these systems and positioning them at the interface of logic philosophy computer science and game theory A series of further chapters explores repercussions of the dynamic stance for these areas as well as cognitive science
