

A close-up photograph of a construction site. A worker, wearing an orange safety vest and a hard hat, is using a shovel to guide the pouring of grey concrete into a wooden formwork. The concrete is being poured onto a grid of steel reinforcement bars (rebar) that are laid out on a bed of sand. The background shows some green foliage and a blurred construction site.

Velkley,2014-02-14 In *Freedom and the End of Reason* Richard L Velkley offers an influential interpretation of the central issue of Kant's philosophy and an evaluation of its position within modern philosophy's larger history He persuasively argues that the whole of Kantianism not merely the Second Critique focuses on a critique of practical reason and is a response to a problem that Kant saw as intrinsic to reason itself the teleological problem of its goodness Reconstructing the influence of Rousseau on Kant's thought Velkley demonstrates that the relationship between speculative philosophy and practical philosophy in Kant is far more intimate than generally has been perceived By stressing a Rousseau inspired notion of reason as a provider of practical ends he is able to offer an unusually complete account of Kant's idea of moral culture *The Shape of Wonder* Alan Lightman,Martin Rees,2025-09-02 In this captivating insightful book acclaimed physicists Alan Lightman and Martin Rees illuminate the life and work of numerous scientists in order to demystify the scientific process and show that scientists are concerned citizens just like the rest of us Remarkable Illuminating with refreshing clarity the ordinary and sometimes extraordinary work of scientists This book is essential reading Jennifer Ackerman bestselling author of *What an Owl Knows* In an age of rapid scientific discovery and technological advancement it's understandable that many feel uneasy about the future While we might have confidence in these new developments when we go to the hospital for a medical procedure fly in an airplane or take an elevator to the top floor of a building the motivations and lives of scientists themselves feel shrouded from public view There is a growing sense that scientists are not to be trusted that they may be guided by political or financial interests or beholden to governments or state institutions This growing mistrust of scientists is an urgent problem With the onset of climate change the imminent threats of pandemic or nuclear war and rapid acceleration in the fields of artificial intelligence and DNA sequencing innovations in science have the potential to change the world It's crucial that we not only gain a better understanding of science as a field but also reestablish trust with its practitioners *The Shape of Wonder* guides us through the fascinating lives and minds of scientists around the world and throughout time from a young theoretical physicist who works as a research assistant professor at the University of Washington and rock climbs in their free time to German physicist Werner Heisenberg in his early life when he was a student of music and philosophy to Govind Swarup an Indian astronomer whose work on radio telescopes was profoundly important We get an inside peek at what makes scientists tick their daily lives passions and concerns about the societies they live in In this brilliant and elucidative work Lightman and Rees pull back the curtain on the field of science revealing that scientists are driven by the same sense of curiosity wonder

Intellectual Origins of the French Enlightenment Ira O. Wade,2015-03-08 With the same sense of historical responsibility and veracity he has exemplified in his studies on Voltaire Ira O Wade turns now to Voltaire s milieu and begins an account of the French Enlightenment which will explain its genesis its nature and coherence and its diffusion in the modern world To understand the movement of ideas that produced the spirit of the Enlightenment Mr Wade identifies and examines the people events and rich development of philosophy in the Renaissance and seventeenth century He considers in turn the challenges of the Renaissance and the responses of its leading writers Rabelais Bacon and Montaigne Baroque thought Descartes Hobbes Pascal the Freethinkers and Classicism Moliere Spinoza Locke Leibniz Newton Mr Wade begins his discussion by examining the critical literature on the Enlightenment and concludes with a theoretical chapter The Making of a Spirit As the history of an intellectual culture his study makes vivid the power of thought in the making of a civilization Originally published in 1971 The Princeton Legacy Library uses the latest print on demand technology to again make available

previously out of print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. Western Journal of Education, 1919. **Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations for 1997: National Aeronautics and Space Administration** United States. Congress. House. Committee on Appropriations. Subcommittee on VA, HUD, and Independent Agencies, 1996. **Phenomenological Interpretation of Kant's Critique of Pure Reason** Martin Heidegger, 1997-11-22. The eminent philosopher delivers an illuminating interpretation of Kant's magnum opus in what is itself a significant work of Western philosophy. The text of Martin Heidegger's 1927-28 university lecture course on Emmanuel Kant's Critique of Pure Reason presents a close interpretive reading of the first two parts of this masterpiece of modern philosophy. In this course Heidegger continues the task he enunciated in *Being and Time* as the problem of dismantling the history of ontology using temporality as a clue. Heidegger demonstrates that the relation between philosophy, ontology, and fundamental ontology is rooted in the genesis of the modern mathematical sciences. He also shows that objectification of beings as beings is inseparable from knowledge a priori, the central problem of Kant's Critique. He concludes that objectification rests on the productive power of imagination, a process that involves temporality, which is the basic constitution of humans as beings.
