

Module 2: Phylogeny

1. In module 1, you identified which species of lizards were most similar to one another based on relative limb length and toe pad size. In this module, you determined which lizards are more similar to one another based on what type of information?

2. Are the species of lizard that are more similar to one another according to body type also more closely related based on the results obtained in this module? Explain your answer.

3. The figures below show two phylogenetic trees similar to the one you constructed in the virtual lab but with more lizards. The trees below show the evolutionary relationships among species from four ecomorphs from the four largest Caribbean islands.

saddest part of ignorance is that many wrong and false perceptions are unleashed when people don't know how to correct them. It can easily lead many to abandon Christianity and also prevents many from choosing Christianity. Everyone should be free to choose whether to believe the message but it would be good if the choice were based on correct information and not just one often distorted view on the matter. This book examines many of the questions and answers related to Christianity that have come up in discussions. The book is not intended to make you a believer and you don't even have to agree with the ideas. The goal is to provide an alternative to what otherwise seems to be quite one-sided thinking and hopefully help you understand things related to Christianity better.
