managing people in small businesses encompasses compliance with the applicable labour laws hiring and creating a channel for dealing with employee issues The price of not having the right employees in a small business can be extremely high Workers who are inefficient or in the wrong role can have critical consequences on the sustainability of a small business While most entrepreneurs focus on marketing finance operations and customers in their initial stages this means that they at times fail to establish and address their HR function and the associated challenges that if overcome may help the organisation to meet all of its targets This book aims to highlight these HR challenges and shed new light on how to answer them *The Cumulative Book Index* ,1922 **Subject Guide to Books in Print** ,1997 **Introduction to Management Science** Bernard W. Taylor,1996 This introduction to the often mathematically rigorous techniques and applications of management science is designed to make the subject accessible for students with no mathematical background or skills It focuses on management science not only as a collection of techniques and processes but as a philosophy and method for approaching problems in a logical manner as skill that is applicable across disciplines and endeavours in all types of jobs and organizations The author s perspective is contemporary his approach hands on and his pedagogy abundant supportive and user friendly for students and instructors alike **Positive Development** Janis Birkeland,2012-05-16 Janis Birkeland presents the innovative new paradigm of Positive Development in which the built environment provides greater life quality health amenity and safety for all without sacrificing resources or money With a different form of design development itself can become a sustainability solution A cornerstone of this new paradigm is the eco retrofitting of the vast urban fabric we already inhabit The author presents a revolutionary new tool called SmartMode to achieve this end This book challenges everyone working in or studying the areas of sustainable development planning architecture or the built environment to rethink their current ideas and practices *ELECTRONICS* I.
