The GE90 - An Introduction

GE-90 TURBOFAN ENGINE (CUT-AWAY VIEW)

Built by General Electric in conjunction with SNECMA of France, IHI of Japan and FiatAvio of Italy, and first commissioned by the British Airways for its new fleet of Boeing 777s recently (September 1995), it is the most powerful commercial aircraft engine today. Certified at a Take-Off Thrust of 380 kN (85,000 lb.), only two engines suffice for a huge aircraft like the 777 with a seating capacity of 375 (weight approx. 230 tonnes). A derivative of the GE/NASA Energy Efficient Engine (E³) program, it is also the most fuel efficient, silent and environment friendly engine of today. In addition to the highest thrust to be offered, the GE90 is expected to provide sidings

Knezevic,1997-07-31 Maintainability is of crucial importance throughout industry and is established as one of the most important issues in the aerospace and defence arena No new system can be introduced without full maintainability analysis and demonstration a type of analysis which reduces life cycle costs by decreasing operational and maintenance costs and increasing systems operational effectiveness leading in turn to the creation of more competitive products This book establishes the full methodology for maintainability mathematics and modelling as well as the relationship between the maintainability and maintenance processes *Care and Repair of Advanced Composites* Keith B Armstrong,William Cole,Eric Chesmar,Francois Museux,2020-12-31 The new edition of the well known *Care and Repair of Advanced Composites* 3rd Edition improves on the usefulness of this practical guide geared towards the aerospace industry Keith B Armstrong the original lead author of the first edition was still in charge of this project counting on the expert support of Eric Chesmar senior composites specialist at United Airlines Mr Chesmar is also an active member of SAE International s CACRC Commercial Aircraft Composite Repair Committee an elite group of industry experts dedicated to the standardization safety security and efficiency of composite repairs in the airline industry Mr Francois Museux Airbus and Mr William F Cole II also contributed *Care and Repair of Advanced Composites* 3rd Edition presents a fully updated approach to the training syllabus recommended for repair design engineers and composite repair mechanics Metal bonding has been included partly because the definition of composite can be interpreted to include metal skinned honeycomb panels and partly because some composite parts have metal fittings or reinforcements that must be treated before bonding This third edition also covers a number of the problems experienced in service some of which may be applicable to metallic sandwich panels offers
