

Virtual Gel Electrophoresis Lab

The screenshot displays the Virtual Gel Electrophoresis Lab interface. On the left, a software window titled "Enter Size Estimates Here" features three input fields, each with a "0000" value and a "bp" unit. To the right of these fields is a gel image with two lanes: "DNA Sample" and "DNA Size Standard". The sample lane shows three distinct bands, while the standard lane shows five bands labeled 6000 bp, 5000, 4000, 3000, and 2000. On the far right, a document titled "Gel Electrophoresis Manual Lab" is visible, containing sections for "Background", "Objectives", and "Pre-lab Questions". Below these elements is a 3D illustration of the lab setup. It includes a "Pipette" being used to add "Loading buffer / DNA sample" into a multi-well plate. A "Gel box with buffer and gel" is shown in the center, and a "Power supply" is on the right. Arrows indicate the flow of materials and the connection of the power supply to the gel box.

In this lab students will model the procedure of setting up the gel, loading the DNA samples, assembling the gel apparatus, hooking up the electric current, and finally analyzing the results.
