drug legalization obscenity and pornography The final two chapters discuss inchoate offenses where the criminal act has not been completed and various criminal defenses such as legal insanity entrapment coercion self defense and mistake of fact or law Important keywords introduce each chapter and discussion questions and suggested readings appear at the end of each chapter prompting lively debate and further inquiry into a fascinating subject area that continues to evolve Updated to include the latest developments in the law this book is appropriate for undergraduate students in criminal law and related courses

An Investigation of the Causal Inference between Epidemiology and Jurisprudence Minsoo Jung,2018-01-31 This book examines how legal causation inference and epidemiological causal inference can be harmonized within the realm of jurisprudence exploring why legal causation and epidemiological causation differ from each other and defining related problems The book also discusses how legal justice can be realized and how victims rights can be protected It looks at epidemiological evidence pertaining to causal relationships in cases such as smoking and the development of lung cancer and enables readers to correctly interpret and rationally use the results of epidemiological studies in lawsuits The book argues that in today s risk society it is no longer possible to thwart the competence of evidence using epidemiological research results In particular it points out that the number of cases that struggle to prove a causal relationship excluding those using epidemiological data will lead to an increase in the number of lawsuits for damages that arise as a result of harmful materials that affect our health The book argues that the responsibility to compensate for damages that have actually occurred must be imputed to a particular party and that this can be achieved by understanding causal inferences between jurisprudence and epidemiology This book serves as a foundation for students academics and researchers who have an interest in epidemiology and the law and those who are keen to discover how jurisprudence can bring these two areas together
