The Routledge Handbook of Cartographic Humanities Tania Rossetto, Laura Lo Presti, 2024-06-03 The Routledge Handbook of Cartographic Humanities offers a vibrant exploration of the intersection and convergence between map studies and the humanities through the multifaceted traditions and inclinations from different disciplinary geographical and cultural contexts. With 42 chapters from leading scholars, this book provides an intellectual infrastructure to navigate core theories, critical concepts, phenomenologies, and ecologies of mapping while also providing insights into exciting new directions for future scholarship. It is organised into seven parts. Part 1 moves from the depths of the human maps relation to the posthuman dimension from antiquity to the future of humanity, presenting a multidisciplinary perspective that bridges chronological distances, introspective instances, and social engagements. Part 2 draws on ancient archaeological, historical, and literary sources to consider the materialities and textures embedded in such texts. Fictional and non-fictional cartographies are explored, including layers of time, mobile historical phenomena, unmappable terrain features, and even animal perspectives. Part 3 examines maps and mappings from a medial perspective, offering theoretical insight into cartographic mediality as well as studies of its intermedial relations with other media. Part 4 explores how a cultural cartographic perspective can be productive in researching the digital as a human experience, considering the development of a cultural attentiveness to a wide range of map-related phenomena that interweave human subjectivities and nonhuman entities in a digital ecology. Part 5 addresses a range of issues and urgencies that have been and still are at the centre of critical cartographic thinking, from politics, inequalities, and discrimination. Part 6 considers the growing amount of literature and creative experimentation that involve mapping in practices of eliciting individual life histories, collective identities, and self-accounts. Part 7 examines the variety of ways in which we can think of maps in the public realm. This innovative and expansive Handbook will appeal to those in the fields of geography, art, philosophy, media, and visual studies, anthropology, history, digital humanities, and cultural studies, as well as industry professionals.

**Universal Navigation on Smartphones** Hassan A. Karimi, 2011-08-04 Universal navigation is accessible primarily through smart phones, providing users with navigation information regardless of the environment, i.e. outdoor or indoor. Universal Navigation on Smartphones provides the most up-to-date navigation technologies and systems for both outdoor and indoor navigation. It also provides a comparison of the similarities and differences between outdoor and indoor navigation systems from both a technological standpoint and user's perspective. All aspects of navigation systems, including geo-positioning, wireless communication, databases, and functions, will be introduced. The main thrust of this book presents new approaches and techniques for future navigation systems, including social networking as an emerging approach for navigation.
