

TO WIND THE BOBBIN

Stop
motion
knob

The
balance
wheel

Fig. 3

Loosen the balance wheel by turning the stop-motion knob toward you (Fig. 3) and place a spool of thread on the spool pin

(A). Pass the end of the thread through the notch on front upper left corner of machine (B), and through the disk at the bottom right of the machine from below (C). Then wind the bobbin seven or eight times with the free end of the thread, and put the threaded bobbin on the spindle of the bobbin winder (D).

Press the bobbin on the spindle with the left hand, and make sure that it is pressed to the end of the spindle, until the slot in the bobbin fits into the pin on the spindle. Exert a little pressure between the bobbin and the rubber wheel until the latter presses right against the hub of the balance wheel, and the clasp (E) retains the winder in position. Turn the balance wheel toward you by hand, and proceed to operate the rheostat control, as in sewing until bobbin is almost full. Then break off the thread, and detach the bobbin from the spindle.

Should the thread not wind evenly on the bobbin, loosen the screw (F) which holds the tension bracket in position on the bed of the machine, and slide the tension bracket to the right or left, as desired then tighten the screw.

Household Sewing Machine Manual

Singer Sewing Machine Company

A decorative graphic element consisting of a red and white circular shape, resembling a stylized 'S' or a sewing machine foot, positioned to the right of the company name.
