Building a Website: Designing a Website Page with CSS

1. Designing a Website Page with CSS

The first design decision you must make is whether to use a template or a custom design. A template is a pre-designed page layout that you can modify to suit your needs. A custom design is a page layout that you create from scratch.

This document is a template. It is designed to be used as a starting point for creating a website. It contains a header, a main content area, and a footer. The header contains the site's name and navigation links. The main content area contains the site's content. The footer contains the site's contact information and copyright notice. The template is designed to be easy to use and modify. It is also designed to be flexible and adaptable to different types of websites.
