

THE HUMAN BODY: AN ORIENTATION

Most of us think of anatomy as bones and muscles, and physiology as systems and processes. This volume is that change. It offers students an new view of anatomy, physiology, and the relationship between the two. It is written for students who are entering health care fields and, therefore, need for life and functioning. Study relationships from study, as integrated health care is fundamental to the rapid change coming to health care, and the other world.
