The Future of Disaster Management in the U.S. Amy LePore, 2016-12-08. U.S. congressional debates over the last few years have highlighted a paradox, although research demonstrates that emergencies are most effectively managed at the local level, fiscal support and programmatic management in response to disasters has shifted to the federal level. While the growing complexity of catastrophes may

overwhelm local capacities and would seem to necessitate more federal engagement can a federal approach be sustainable and can it contribute to local capacity building This timely book examines local capacity building as well as the current legal policy and fiscal framework for disaster management questioning some of the fundamentals of the current system exploring whether accountability and responsibilities are correctly placed offering alternative models and taking stock of the current practices that reflect an effective use of resources in a complex emergency management system The Future of Disaster Management in the U S will be of interest to disaster and emergency managers as well as public servants and policy makers at all levels tasked with responding to increasingly complex catastrophes of all kinds *The CSR International Research Compendium: Volume 2 - Environment* Wayne Visser,Ileana Magureanu,Karina Yadav,2015-03-30 In this 610 page Compendium CSR International has compiled summaries of the best research on corporate sustainability social responsibility and business ethics since 2009 This second volume on Environment profiles over 500 research publications between 2009 and 2014 including practitioner reports market surveys and academic papers from over 80 authors and more 400 organisations Specifically it contains research abstracts on the following environment related topic areas Sustainable Development and the Green Economy Sustainability Practices Sustainable Resource Use Prevention of Pollution Climate Change Protection of the Environment and Biodiversity Sectoral Approaches We believe this Compendium will serve as an invaluable resource for academics students researchers and professionals around the world who share our interest and passion for social responsibility sustainability business ethics and corporate accountability **Natural Disasters, Foreign Trade and Agriculture in Mexico** Sergio O. world's population is living on just 2% of the land surface with most of these cities located in Asia and developing countries that have high vulnerability and intensification. Self-Defense in Mexico Luis Hernández Navarro, 2020-03-02. In Mexico and across other parts of Latin America, local Indigenous peoples have built community policing groups as a means of protection where the state has limited control over and even complicity in crime and violence. Luis Hernández Navarro, a leading Mexican journalist, offers a riveting investigation of these armed self-defense groups that sprang up around the time of the 1994 Zapatista uprising in Chiapas. Available in English for the first time, the book spotlights the intense precarity of everyday life in parts of Mexico. Hernández Navarro shows how the self-defense response, which now includes wealthier rancher and farmer groups, is being transformed by Mexico's expanding role in the multibillion-dollar global drug trade by foreign corporations' extraction of raw minerals in traditionally Indigenous lands and by the resulting social changes in local communities. But as Hernández Navarro acknowledges, self-defense is highly controversial. Community policing may provide citizens with increased agency, but for government officials, it can be a dangerous threat to the status quo. Leftists and liberals are wary of how the groups may be linked to paramilitary forces and vulnerable to manipulation by drug traffickers and the government alike. This book answers the urgent call to understand the dangerous complexities of government failures and popular solutions.
