As climate change and extreme weather events increasingly threaten traditional landscapes and livelihoods of entire communities, the need to study its impact on human migration and population displacement has never been greater. The Atlas of Environmental Migration is the first illustrated publication mapping this complex phenomenon. It clarifies terminology and concepts, draws a typology of migration related to environment and climate change, describes the multiple factors at play, explains the challenges and highlights the opportunities related to this phenomenon. Through elaborate maps, diagrams, illustrations, case studies from all over the world based on the most updated international research findings, the Atlas guides the reader from the roots of environmental migration through to governance. **Disaster Upon Disaster** Susanna M. Hoffma, Roberto E. Barrios, 2019-10-03. A consistent problem that confronts disaster reduction is the disjunction between academic and expert knowledge and policies and practices of agencies mandated to deal with the concern. Although a great deal of knowledge has been acquired regarding many aspects of disasters such as driving factors, risk, construction, complexity of resettlement, and importance of people's culture, very little has become protocol and procedure. Disaster Upon Disaster illuminates the numerous disjunctions between the suppositions, realities, agendas, and executions in the field. It goes on to detail contingencies, predicaments, old and new plights, and finally advances solutions toward greatly improved outcomes.
