1. The Industrial Revolution

Learning Target: Explain how the Industrial Revolution facilitated the growth and diffusion of industrialization.

Industrial Revolution: A period of rapid growth in the use of machines in manufacturing and production that began in the mid-1700s.

- Began in England with the invention of the steam engine and diffused out from the hearth
- Caused an increase in food production (as new technological advances occurred in farming) and caused more people moved to the cities
- Increased the gap wage between the poor and the wealthy
- Increases imperialism and colonialism because of need of raw materials (coal, lumber, cotton, etc)

2. Economic Sectors and Patterns

Learning Target: Explain the spatial patterns of industrial production and development.

Sector	Definition	Job Examples	T-shirt Company Example
Primary	Extraction of raw materials	Mining, fishing, lumber, agriculture, etc	Cotton Farmer
Secondary	Processing natural materials into finished goods	Manufacturing, construction, utilities, etc.	T-shirt manufacturer company
Tertiary	Offering services to consumers	Retail, tourism, entertainment, etc	T-shirt Store
Quaternary	Research and administration involved often associated with technological innovation	finance, insurance, marketing, and wholesaling.	Researcher on how to make t-shirts stainless

Site Factors: industrial location factors related to the costs of the factors of production inside the factory/hay

- Capital - funds to establish new factories or expand existing ones. Most important site factor in certain industries (high-tech). More difficult for developing countries to gain access to capital
- Labor - most important site factor globally

Labor-Intensive Industry: wages and other compensation paid to employees constitute a high percentage of expenses

Break-of-Bulk Point: A location where transfer is possible from one mode of transportation to another (cargo ship to train)

Agglomeration: the process by which a certain region becomes known for producing a certain product. Examples of this include Los Angeles for movies, Houston for energy, or Silicon Valley for computer technology.

Weber's Least Cost Theory: Minimize three categories of costs to increase profits: Transportation (weight and distance), Labor (cheap labor), and Agglomeration

- **Bulk-Gaining** - makes something that gains volume or weight during production. To minimize transportation costs, they focus on proximity to markets.
- **Bulk-Reducing** - Makes something that loses volume or weight during production. To minimize transportation costs, they focus on proximity to inputs
- **Agglomeration:** clustering of productive activities and people for mutual advantage (example: mall)

1. labor, transportation (including shipping containers), the break-of-bulk point, least cost theory, markets, and resources influence the location of manufacturing such as core, semi periphery, and periphery locations.

Cavallo, Associate Dean for Research and Graduate Studies at the University of Texas at Arlington, REA's test prep provides extensive coverage of the four core subject areas tested on the exam: English Language Arts and Reading (806), Mathematics (807), Social Studies (808), and Science (809). In addition to a thorough review, this test prep features a diagnostic test and 2 full-length practice test batteries (1 in the book and 1 online at the REA Study Center) that deal with every question type, competency, and skill tested on the exam.
