**Genetics in the Madhouse** Theodore M. Porter,2018-06-05 The untold story of how hereditary data in mental hospitals gave rise to the science of human heredity In the early 1800s a century before there was any concept of the gene physicians in insane asylums began to record causes of madness in their admission books Almost from the beginning they pointed to heredity as the most important of these causes As doctors and state officials steadily lost faith in the capacity of asylum care to stem the terrible increase of insanity they began emphasizing the need to curb the reproduction of the insane They became obsessed with identifying weak or tainted families and anticipating the outcomes of their marriages Genetics in the Madhouse is the untold story of how the collection and sorting of hereditary data in mental hospitals schools for feeble-minded children and prisons gave rise to a new science of human heredity In this compelling book Theodore Porter draws on untapped archival evidence from across Europe and North America to bring to light the hidden history behind modern genetics He looks at the institutional use of pedigree charts censuses of mental illness medical social surveys and other data techniques innovative quantitative practices that were worked out in the madhouse long before the manipulation of DNA became possible in the lab Porter argues that asylum doctors developed many of the ideologies and methods of what

would come to be known as eugenics and deepens our appreciation of the moral issues at stake in data work conducted on the border of subjectivity and science A bold rethinking of asylum work Genetics in the Madhouse shows how heredity was a human science as well as a medical and biological one A Study of the Long Bones of the English Skeleton Karl Pearson, Julia Bell, 1917 *A First Study of the Inheritance of Vision and of the Relative Influence of Heredity and Environment on Sight* Amy Barrington, Karl Pearson, 1909 *The Corporate Eye* Elspeth H. Brown, 2008-03 Winner Association of American Publishers Professional and Scholarly Publishing Award in Business Management and Accounting In the late nineteenth century corporate managers began to rely on photography for everything from motion studies to employee selection to advertising This practice gave rise to many features of modern industry familiar to us today consulting scientific approaches to business practice illustrated advertising and the use of applied psychology In this imaginative study Elspeth H Brown examines the intersection of photography as a mass technology with corporate concerns about efficiency in the Progressive period Discussing among others the work of Frederick W Taylor Eadweard Muybridge Frank Gilbreth and Lewis Hine Brown explores this intersection through a variety of examples including racial discrimination in hiring the problem of photographic realism and the gendered assumptions at work in the origins of modern marketing She concludes that the goal uniting the various forms and applications of photographic production in that era was the increased rationalization of the modern economy through a set of interlocking managerial innovations technologies that sought to redesign not only industrial production but the modern subject as well *Journal of the Washington Academy of Sciences* Washington Academy of Sciences (Washington, D.C.), 1916 Its Directory issued as the Sept no 1926 67 Early Psychological Research Contributions from Women of Color, Volume 1 Jon Grahe, Michelle Ceynar, Rihana S.
