Human Rights Watch World Report 1995:

Human Rights Watch World Report 1999 Human Rights Watch Staff, 1998-10-12 **The Power of Human Rights**
Thomas Risse, Stephen C. Ropp, Kathryn Sikkink, 1999-08-05 This book celebrated the 50th anniversary of the Universal Declaration of Human Rights by showing how global human rights norms have influenced national government practices in eleven different countries around the world Had the principles articulated in the Declaration had any effect on the behavior of states towards their citizens What are the conditions under which international human rights norms are internalized in domestic practices And what can we learn from this case about why how and under what conditions international norms in general influence the actions of states This book draws on the work of social constructivists to examine these important issues The contributors examine eleven countries representing five different world regions Northern Africa Sub Saharan Africa Southeast Asia Latin America and Eastern Europe drawing practical lessons for activists and policy makers concerned with preserving and extending the human rights gains made during the past fifty years *Genocide* Alexander Laban Hinton, Kevin Lewis O'Neill, 2009-04-07 Leading anthropologists consider issues of truth memory and representation in the aftermath of genocides in the Balkans Guatemala Indonesia East Timor Germany Nigeria Rwanda and Sudan *Protection Against Genocide* Neal Riemer, 2000-03-30 Without succumbing to utopian fantasies or realistic pessimism Riemer and his contributors call for strengthening the key institutions of a global human rights regime developing an effective policy of prudent prevention of genocide working out a sagacious strategy of keenly targeted sanctions political economic military judicial and adopting a guiding philosophy of just humanitarian intervention They underscore significant changes in the international system the end of the Cold War economic globalization the communications revolution that hold open the opportunity for significant if modest movement toward strengthening key institutions The essays explore key problems in working toward prevention of genocide They highlight the existence of considerable early warning of genocide and emphasize that the real problem is a lack of political will in key global institutions Sanctions especially economic sanctions may punish a genocidal regime but at the expense of innocent civilians Thus more clearly targeted sanctions are seen as essential The argument on behalf of a standing police force to deal with the crime of genocide as they show is powerful and controversial powerful because the need is persuasive controversial because political realists question its cost and political feasibility Implementing a philosophy of just humanitarian intervention requires an appreciation of the difficulties of interpreting those principles in difficult concrete situations A permanent international criminal tribunal to deter and punish genocide they argue will put into place a much needed component of a global human rights regime A thoughtful analysis for scholars and students of international politics and law and human rights in general *Memory and Justice in Post-Genocide Rwanda* Timothy Longman, 2017-07-13 Following times of great conflict and tragedy many countries implement programs and policies of transitional justice none more extensive than in post genocide Rwanda Placing Rwanda s transitional justice

initiatives in their historical and political context this book examines the project undertaken by the post genocide government to shape the collective memory of the Rwandan population both through political and judicial reforms but also in public commemorations and memorials Drawing on over two decades of field research in Rwanda Longman uses surveys and comparative local case studies to explore Rwanda s response both at a governmental and local level He argues that despite good intentions and important innovations Rwanda s authoritarian political context has hindered the ability of transnational justice to bring the radical social and political transformations that its advocates hoped Moreover it continues to heighten the political and economic inequalities that underline ethnic divisions and are an important ongoing barrier to reconciliation

Developing Democracy Larry Diamond,1999-05-07 The book concludes with a hopeful view of the prospects for a fourth wave of global democratization *Child Soldiers in the Age of Fractured States* Scott Gates,Simon Reich,2010-01-31

Current global estimates of children engaged in warfare range from 200 000 to 300 000 Children s roles in conflict range from armed and active participants to spies cooks messengers and sex slaves *Child Soldiers in the Age of Fractured States* examines the factors that contribute to the use of children in war the effects of war upon children and the perpetual cycle of warfare that engulfs many of the world s poorest nations The contributors seek to eliminate myths of historic or culture based violence and instead look to common traits of chronic poverty and vulnerable populations Individual essays examine topics such as the legal and ethical aspects of child soldiering internal UN debates over enforcement of child protection policies economic factors increased access to small arms displaced populations resource endowments forced government conscription rebel enforced quota systems motivational techniques employed in recruiting children and the role of girls in conflict The contributors also offer viable policies to reduce the recruitment of child soldiers such as the protection of refugee camps by outside forces naming and shaming and criminal prosecution by international tribunals Finally they focus on ways to reintegrate former child soldiers into civil society in the aftermath of war *Encyclopedia of Human Rights*

Edward H. Lawson,1996 Preface to the first edition **International Law of Human Rights** MichaelK. Addo,2017-07-05

International law is a social construct crafted by human endeavour to achieve or at least contribute to the achievement of goals perceived to be valuable or necessary to effective social relations In effect international law is no more than a facilitative process and so cannot have answers and conclusions of its own other than what lies within the ambitions of those who define the limits of the process The essays collected together here reveal how international law facilitates the achievement of the long standing ambition of turning human rights ideals and rhetoric into reality Global Energy Security

and American Hegemony Doug Stokes,Sam Raphael,2010-06-07 An analysis of the United States and energy security that examines the close relationship between US military supremacy in oil rich regions and America s maintenance of global power It is suitable for scholars of US foreign policy and international relations as well as policy makers grappling with the importance of energy security *Global Perspectives on US Foreign Policy* S. Burt,D. Añorve,2013-10-10 This book explores

aspects of US foreign policy including the development process as well as the policy itself in respect to various countries and regions and some significant issues around the globe today Providing insight into non US perspectives of American foreign policy the book contextualizes the effects of policy on external nations *Turkey and European Integration* Nergis Canefe, Mehmet Ugur, 2004-08-02 This book examines the important issue of Turkey's relationship with Europe The authors uniquely present the Turkish view of integration within the broad context of the debates on Europeanisation and sovereignty but with a specific focus on the internal debates and issues in Turkey itself Key issues considered include populism economic policy design nationalism Islam human rights business public attitudes to Europeanisation and the position of the Turkish polity *Desperate Crossings* Norman L. Zucker, Naomi Flint Zucker, 2016-09-16 This work provides an examination of US refugee policy since the 1960s particularly as it has been applied to Cuba Haiti and Central America The authors also address world wide refugee problems proposing ideas for the 21st century *The World and Yugoslavia's Wars* Richard Henry Ullman, 1996 What can outside powers do now to help heal the terrible wounds caused by Yugoslavia's wars Why did the victors in the Cold War and the 1991 Gulf War not act to stop the slaughter The nature scope and meaning of the actions and inactions of outsiders is the subject of this book *The International Dimensions of Internal Conflict* Michael Edward Brown, 1996 Internal conflicts threaten many countries and regions globally The first part of this book examines the sources of internal conflicts and the ways these may affect neighbouring states and the international community The second part covers specific problems policy instruments and key actors *The Transition to National Armies in the Former Soviet Republics, 1988-2005* Jesse Paul Lehrke, 2013 This book looks at the militaries of the late Soviet and post Soviet republics Beginning with the end of the Soviet era it recognises that the successor states did not spring from nowhere but inherited a legacy that influenced all that followed The book discusses how politicians control the instruments that are the manifestation of the state's monopoly on violence and how society views and supports the military By taking a bottom up empirical approach that examines the personnel leaders organisations and institutions and their outlook and attitudes the book presents a comprehensive picture of the armed forces showing how the armed forces are very significantly shaped by the surrounding political and social environment The book goes on to examine the armed forces in action and highlights that to truly understand the militaries studies need to go beyond looking at the static structures **Human Rights Law in Africa 1998** Christof Heyns, 2001-04-11 Statute of the ICTR *Human Rights Law in Africa, Volume 3 (1998)* Christof Heyns, 2021-11-01 **NGO's and the Universal Declaration of Human Rights** W. Korey, 2001-02-02 When the Universal Declaration of Human Rights was adopted 50 years ago Eleanor Roosevelt its principal architect predicted that a curious grapevine would carry its message behind barbed wire and stone walls This book tells the extraordinary story of how NGOs became the grapevine she anticipated sharpening our awareness about the violations of human rights shaming its most notorious abusers and creating the international mechanisms to bring about implementation of the Declaration Korey traces

how NGO s laid the groundwork for the destruction of the Soviet empire as well as of the apartheid system in South Africa and established the principle of accountability for crimes against humanity The notion of human rights has progressed from being a marginal part of international relations a half century ago to stand today as a critical element in diplomatic discourse and this book shows that it is the NGOs that have placed human rights at the centre of humankind s present and future agenda

Global Migrants, Global Refugees Aristide R. Zolberg, Peter M. Benda, 2001-06-01 In recent years several influential commentators have stated or strongly implied that the advanced industrial democracies are today being overwhelmed by a host of problems including rapid population growth the breakup of multi ethnic states environmental degradation and increasing economic differentials between the developing and developed worlds for which no effective solutions are at hand The migration inducing potential of these post Cold War developments has been a particular source of concern This volume provides a counter catastrophic view of developments and a more sober and balanced assessment of the challenges the United States and other industrial democracies face in the sphere of international migration than that offered in recent years The first part is devoted to a diagnosis of the problem revaluation of the notion of a migration crisis by examining the likely consequences of population growth environmental degradation and political conflict in the developing and post communist worlds Special attention is also given to the manifestations of these forces in the western hemisphere where they may have direct consequences for immigration to the United States In the second part the implications for U S policy are considered ranging from promotion of democracy and development of strategies for minimizing international migrations and refugee flows to the intricacies of humanitarian relief and intervention when preventive measures prove ineffective
