Measuring Up Arie L. Nettles, Michael T. Nettles, 2012-12-06 *Measuring Up* revisits vital issues of equity and assessment through the research efforts and insights of many of the nation's most prominent educators and assessment experts. As its most urgent purpose, the publication aims to sensitize readers to the unfairness and inappropriate uses of testing instruments which under optimal circumstances have the potential to benefit all students. With America fervently espousing both national and state testing, the differential performance by race and social class raises the specter of tests as barriers to life milestones such as promotion, graduation, and college admissions. In response to such punitive testing, the papers included here explore a host of models and practices that are currently being piloted both in America and abroad as educators grapple with the effects the assessment is having on minority and disadvantaged students and school systems. In the process, outcomes of innovative portfolio and authentic assessments are weighed against important standards and principles of validity and consequences. As the various authors probe the gap between African American and White test scores, they raise important questions of resources, family background, and educational opportunity. Beyond their value of their recommendations to educators, their papers help to identify causes of pupil deficiencies in ways that can be addressed by policymakers. To reinforce the emphasis on equity, several authors present a definitive defense of affirmative action as a critical countermeasure to the lack of fairness in school quality, family and social supports, and educational resources. Classroom Connections, Grade 1 Thinking Kids, Carson-Dellosa Publishing, 2015-05-04 *Classroom Connections* brings math, language arts, and science together around a common skill. This book for first graders covers vowel sounds, synonyms and antonyms, homophones, reading comprehension, addition, subtraction, measurement, and critical thinking. The *Classroom Connections* series provides math, language arts, and science practice for children in kindergarten to grade 3. Each page ties three subject areas together around a common skill, giving children a fresh way to look at important concepts. Children are also provided with extension activities, tips, and hints related to each skill to encourage additional learning and real-world application.

Improving Reading Comprehension of Middle and High School Students Kristi L. Santi, Deborah K. Reed, 2015-03-04 This volume focuses on our understanding of the reading comprehension of adolescents in a high-stakes academic environment. Leading researchers share their most current research on each issue, covering theory and empirical research from a range of specializations, including various content areas, English language learners, students with disabilities, and reading assessment. Topics discussed include cognitive models of reading comprehension and how they relate to typical or atypical development of reading comprehension; reading in history classes; comprehension of densely worded and symbolic mathematical texts; understanding causality in science texts; the more rigorous comprehension standards in English language arts classes; balancing the practical and measurement constraints of the assessment of reading comprehension; understanding the needs and challenges of English language learners and students in special education with respect to the various content
