

Putting It Together IV

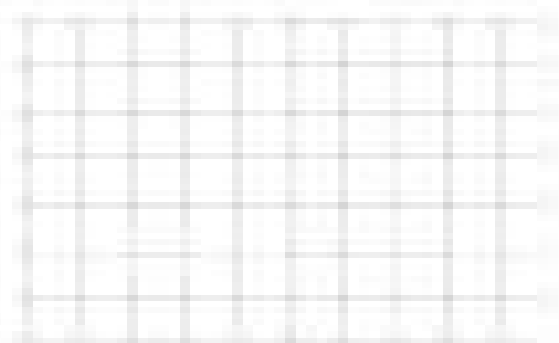

After taking a generalization test, the students may be given systems for the independent variables. For example, on Wednesday, Kaplan takes a derivative of $\sin(x)$ and gets $\cos(x)$. The next day half of the students get a system for $\cos(x)$ and the other half get a system for $\sin(x)$.

Repeat this each day. Kaplan's body remembers half of the material in her system from the day before. Record this information in the table and graph the information.

15. Table of Data

Number of Days (since Wednesday)	Log of Material (in Kaplan's system)
0	1.00
1	0.50

16. Graph of Data

17. What are the independent and dependent variables in the problem situation?

18. What are the domain and range of the problem situation?

19. Is the graph of the data increasing or decreasing?
