Unit 9: Circles Performance Tasks

Instructions: Choose one performance task. Write all your work on a separate clean piece of paper and attach it to this page.

Big Idea: Reasoning and Proof

You can use triangle congruence theorems to prove relationships among tangents and secants.

Performance Task 1

Four tangents are drawn from E to two concentric circles. $A, B, C,$ and D are the points of tangency. Name as many pairs of congruent triangles as possible and tell how you can show each pair is congruent.

Big Idea: Measurement

You can use facts about arcs and angle measures to solve real-world problems.

Performance Task 2

The rocks near the shore between two lighthouses at points A and B make the waters unsafe. The measure of \widehat{AXB} is 300° . Waters inside this arc are unsafe. Suppose you are a navigator on a ship at sea. How can you use the lighthouses to keep the ship in safe waters? Explain your answer.

Big Idea: Coordinate Geometry

You can use coordinates of the center of a circle and its radius to write an equation or a circle.

Performance Task 3

A gardener wants the three rosebushes in her garden to be watered by a rotating water sprinkler. The gardener draws a diagram of the garden using a grid in which each unit represents 1 ft. The rosebushes are at $(1,3)$, $(5,11)$, and $(11,4)$. She wants to position the sprinkler at a point equidistant from each rosebush. Where should the gardener place the sprinkler? Show your work. What equation described the boundary of the circular region that the sprinkler will cover?

Schunk,Barry J. Zimmerman,2023-01-06 In recent years educators have become increasingly concerned with students attempts to manage their own learning and achievement efforts through activities that influence the instigation direction and persistence of those efforts In 1989 Zimmerman and Schunk edited the first book devoted to this topic They assembled key theorists offering a range of perspectives on how students self regulate their academic functioning One purpose of that volume was to provide theoretical direction to ongoing as well as nascent efforts to explore academic self regulatory processes Since that date there has been an exponential surge in research This second volume on academic self regulation offers the fruits of the first generation of research It also addresses a number of key issues that have arisen since then such as how self regulation differs from such related constructs as motivation and metacognition and whether students can be taught self regulatory skills The contributors reveal an interesting uplifting and at times disturbing picture of how students grapple with the day to day problems of achieving in circumstances with inherent limitations and obstacles This volume provides insight into the source of students capabilities to surmount adversities the origins of their self initiated processes designed to improve learning motivation and achievement The text is organized on the basis of a conceptual framework that analyzes academic self regulation into four major dimensions That model is presented in the first chapter and key processes that influence each of these dimensions are discussed by prominent researchers in the chapters that follow Because each chapter is written to follow a common format this work provides a level of continuity and parsimony normally found only in authored textbooks **Educational Research Primer** Anthony Picciano,2004-10-18 An accessible guide designed as an introduction to educational research and statistics Dr Picciano places especial emphasis on understanding and interpreting statistical procedures rather than on working with mathematical formulae The primer covers the main areas of concern to any student embarking on a research project such as how to locate material for research purposes how to plan a research project how to conduct various types of research as well as how to use research in educational practice The primer is brought to life with numerous examples from Dr Picciano s workshops which demonstrate how to interpret various statistical routines using statistical software packages *Manual of Mental and Physical Tests: Complex processes* Guy Montrose Whipple,1915 **Journal for Research in Mathematics Education** ,2010 **Manual of mental and physical tests v.2, 1915** Guy Montrose Whipple,1915 *Lessons Learned* Tom Loveless,2008-08-01 Standards for education achievement are under

scrutiny throughout the industrial world In this technological age student performance in mathematics is seen as being particularly important For more than four decades international assessments conducted by the International Association for Evaluation of Educational Achievement IEA have measured how well students are learning mathematics in different countries The latest round of mathematics testing of the Trends in Mathematics and Science Study TIMSS takes place in 2007 Beyond the horse race the rankings that compare nations what have we learned from the wealth of data collected in these assessments How do US math curriculums compare to those used overseas Is the effect of technology in the classroom uniform across nations How do popular math reforms fare abroad Those are some of the critical issues tackled in this important book The authors use the database to address several pressing questions about school policy and educational research For example Ina Mullis and Michael Martin review the major lessons learned over the history of TIMSS testing William Schmidt and Richard T Houang examine whether curricular breadth affects student achievement Jeremy Kilpatrick Vilma Mesa and Finbarr Sloane evaluate American performance in algebra relative to other nations and pinpoint strengths and weaknesses in American students learning of algebra
