The Distant Glow Terry I. Sarigumba,2014-02-14 As an autobiography The Distant Glow traces the story of my life to the rough and rigorous way of life in Corella Bohol my birthplace Descending from generations of very poor and illiterate ancestors I exceeded my parents grade three education by finishing grade six and graduating as elementary school valedictorian Because my parents could not afford to send me to high school in the city I stayed out of school for six years helping my father on the farm and my mother in household chores One of several backbreaking works I used to do was climbing several coconut trees about 50 feet in height to tap the trees sanggutan for tuba a coconut juice that yields mildly alcoholic drink I used to climb 20 coconut trees every morning noon and evening mount over top sit on one of the palms and tap the juice One evening after sunset while atop the sanggutan I saw a glow a distant glow I muttered to myself Someday Ill find out what causes that glow I equated that statement to my goals in life I did find out what caused the distant glow Other distant glows appeared and I reached most of them with hard work and having a dream When the owners of a private school offered me an opportunity to go to their school free of tuition provided that I maintained the first place standing in the class honor roll I went to high school starting at age 20 To help shoulder the other costs of going to high school in the city I paid my room and board with service scrubbing and polishing the floor fetching water from an artesian well and gathering firewood every weekend for the landlord family With all the hardship I maintained the tuition free deal and graduated from high school as class valedictorian

Mathematical Problems Craig Smoryński, 2020-09-19 The life and soul of any science are its problems This is particularly true of mathematics which not referring to any physical reality consists only of its problems their solutions and most excitingly the challenges they pose Mathematical problems come in many flavours from simple puzzles to major open problems The problems stimulate the stories of their successful solutions inspire and their applications are wide The literature abounds with books dedicated to mathematical problems collections of problems hints on how to solve them and even histories of the paths to the solutions of some famous ones The present book aimed at the proverbial bright high school student takes a different more philosophical approach first dividing mathematical problems into three broad classes puzzles exercises and open problems and discussing their various roles in one s mathematical education Various chapters are devoted to discussing examples of each type of problem along with their solutions and some of the developments arising from them For the truly dedicated reader more involved material is offered in an appendix Mathematics does not exist in a vacuum whence the author peppers the material with frequent extra mathematical cultural references The mathematics itself is elementary for the most part pre calculus The few references to the calculus use the integral notation which the reader need not truly be familiar with opting to read the integral sign as strange notation for area or as operationally defined by the appropriate buttons on his or her graphing calculator Nothing further is required Advance praise for Mathematical Problems There are many books on mathematical problems but Smory ski s compelling book offers something unique Firstly it includes a fruitful classification and analysis of the nature of mathematical problems Secondly and perhaps most importantly it leads the reader from clear and often amusing accounts of traditional problems to the serious mathematics that grew out of some of them John Baldwin University of Illinois at Chicago Smory ski manages to discuss the famous puzzles from the past and the new items in various modern theories with the same elegance and personality He presents and solves puzzles and traditional topics with a laudable sense of humor Readers of all ages and training will find the book a rich treasure chest Dirk van Dalen Universiteit Utrecht
