Historical Analysis Essay

The constitution reads that "All men are created equal", does this include women? To put it simply, no (William & Mary, n.d.). An extraordinary quantity of sex discrimination grievances and suits established the argument that protective labor laws operated as a restriction on women's employment opportunities (see "Civil Rights" in the Law Library American Women guide). The fate of the Equal Rights Amendment is far from decided. From 1972 until 2020 thirty-seven states have ratified the ERA. The reality is, that regardless of the great achievements of women over the years, under the constitution women and men do not have the same rights. The ERA must be ratified in order for women to officially have the same rights and benefits as men. Although the Equal Rights Amendment process has advanced, the amendment needed has not made its official way as part of the constitution. Representative Barbara Jordan made a statement back in 1979 requesting an extension for the ratification deadline (<https://dp.la/primary-source-sets/the-equal-rights-amendment/sources/1206>). Ms. Jordan's statement is an example of the importance of equal rights. The representative argues that is no "contemporaneous census" on the ERA issues. When this statement was made, it had already taken 50 years for the equal rights progress to have come as far as it had. While analyzing history, we must not ignore that we cannot trust our national legislators to do comprehensive work without the ERA being ratified. In other words, the Supreme Court practices the Constitution in its understanding of biased law,

Survival and Event History Analysis Odd Aalen, Ornulf Borgan, Hakon Gjessing, 2008-09-16 The aim of this book is to bridge the gap between standard textbook models and a range of models where the dynamic structure of the data manifests itself fully The common denominator of such models is stochastic processes The authors show how counting processes martingales and stochastic integrals fit very nicely with censored data Beginning with standard analyses such as Kaplan Meier plots and Cox regression the presentation progresses to the additive hazard model and recurrent event data Stochastic processes are also used as natural models for individual frailty they allow sensible interpretations of a number of surprising artifacts seen in population data The stochastic process framework is naturally connected to causality The authors show how dynamic path analyses can incorporate many

modern causality ideas in a framework that takes the time aspect seriously To make the material accessible to the reader a large number of practical examples mainly from medicine are developed in detail Stochastic processes are introduced in an intuitive and non technical manner The book is aimed at investigators who use event history methods and want a better understanding of the statistical concepts It is suitable as a textbook for graduate courses in statistics and biostatistics

Corpus Linguistics and Textual History Percy van Keulen, Willem Th. van Peursen, 2018-07-17 Over the years the use of computers for research has become increasingly important in Biblical Studies However a combination of computational linguistics with diachronic text critical and text historical approaches has hardly ever taken place Quite often there is mutual misunderstanding between computational linguistics and more traditional approaches in the field of linguistics and textual analysis For example in computer assisted research of modern text corpora it is common to treat the text as an unequivocal and unidimensional sequence of characters In Biblical Studies however either text is considered an abstraction the result of a scholarly reconstruction based on the extant textual witnesses Here a fundamental difference in approach reveals itself The present volume tries to overcome the misunderstanding between the various disciplines and to establish how a fruitful interaction of information technology linguistics and textual criticism can contribute to the analysis of ancient texts It addresses questions concerning the confrontation between synchronic and diachronic approaches the role of linguistic analysis in the interpretation of texts and the interaction of linguistic theory and the analysis of linguistic data The first section of this volume contains the papers presented at the CALAP seminar 2003 In the second section different aspects of the interdisciplinary analysis are applied to a selected passage from the Peshitta of Kings **Geometry in History** S. The Scope and History of Commutative and Noncommutative Harmonic Analysis George W. Mackey, 2005-04-08 When I was invited to speak at the conference on the history of analysis given at Rice University in 1977 I decided that it might be interesting to review the history of mathematics and physics in the last three hundred years or so with heavy emphasis on those parts in which harmonic analysis had played a decisive or at least a major role I was pleased and somewhat astonished to find how much of both subjects could be included under this rubric The picture that gradually emerged as the various details fell into place was one that I found very beautiful and the process of seeing it do so left me in an almost constant state of euphoria I would like to believe that others can be led to see this picture by reading my paper and to facilitate this I have included a large number of short expositions of topics which are not widely understood by non specialists from the Preface This volume containing the paper mentioned above as well as five other reprinted papers by Mackey presents a sweeping view of the importance utility and beauty of harmonic analysis and its connections to other areas of mathematics and science A seventh paper written exclusively for this volume attempts to unify certain themes that emerged after major discoveries in 1967 and 1968 in the areas of Lie algebras strong interaction physics statistical mechanics and nonlinear partial differential equations discoveries that may at first glance appear to be independent but which are in fact deeply interrelated Information for our distributors Copublished with the London Mathematical Society beginning with volume 4 Members of the LMS may order directly from the AMS at the AMS member price The LMS is registered with the Charity Commissioners
