Essential Physics for Manual Medicine E-Book Martin Ferrier Young, 2009-09-16 A textbook that covers Physical concepts at a basic level for manual therapists specifically Clinicians in general and manual therapists in particular have a need to understand certain specific aspects of physics to an advanced level. However many lack prior education in this area with chemistry and biology A levels being emphasized in terms of entrance requirements. Most textbooks aimed at this field concentrate exclusively on the physics underpinning biomechanics but the level at which these books are pitched is often too high to allow understanding by students who have an inadequate background in the subject. This book acts in part as a primer to address this deficit. Students are also required to understand the basic physics underpinning physiology biochemistry radiography and therapeutics. This textbook will be a guide to these specialist areas of knowledge. This text will cover biophysics as a core subject to guide the potential clinician from total ignorance to complete mastery in the areas of physics pertinent to manual medicine and its related disciplines. Self assessment questions at the beginning of each chapter allow readers to check their existing knowledge prior to reading the chapter. Each section builds from basic principles to advanced levels. Clinical focus.

Environmental Carbon Footprints Subramanian Senthilkannan Muthu, 2017-09-20 Environmental Carbon Footprints Industrial Case Studies provides a wide range of industrial case studies beginning with textiles energy systems and bio fuels. Each footprint is associated with background information scientific consensus and the reason behind its invention methodological framework assessment checklist calculation tool technique applications challenges and limitations. More importantly applications of each indicator framework in various industrial sectors and their associated challenges are presented. As case studies are the most flexible of all research designs this book allows researchers to retain the holistic characteristics of real life events while investigating empirical events. Includes case studies from various industries such as textiles energy systems and conventional and bio fuels. Provides the calculation tool technique applications challenges and limitations for determining carbon footprints on an industry by industry basis. Presents the background information scientific consensus and reason behind each case study.
