*So Fast, So Easy Pressure Cooker Cookbook* Beth Hensperger, Julie Kaufmann, 2015-12-15 The only pressure cooker cookbook for electric and stovetop pressure cookers you ll ever need What s not to love about the pressure cooker Using pressure created by super heated steam the pressure cooker can cut cook times by 70 percent meaning dinner is on the table faster and with significantly less energy use Your dinner will be more nutrient rich because vitamins and other good things won t be lost in evaporating steam And it will taste delicious and succulent because none of the food s moisture has been allowed to escape Finally today s modern pressure cooker has been re engineered for safety and ease of use including the development of the electric pressure cooker Because no moisture evaporates during cooking conventional stovetop recipes do not work in the pressure cooker For success the pressure cooker requires different food to liquid ratios and because of that superheated pressure cook times are very precise With this comprehensive guide the busy cook can use fresh ingredients to create more than 700 tasty recipes developed for and scrupulously tested and retested for the pressure cooker Chapters on Poultry Pork Beef Veal Lamb Game and Seafood include Zinfandel braised short ribs that cook in just 30 minutes herb stuffed whole turkey breast and braised lamb shanks ready in 25 minutes and baby back ribs that pressure cook in just 15 minutes Individual chapters on grains beans rice dishes including risotto and breakfast rice potatoes chili and tomato sauces with and without meat as well as on soups vegetables desserts making your own baby food and much more An introductory chapter explains the ins and outs of the pressure cooker with valuable tips and advice The authors also include recipes for lots of basics such as how to cook different types of rice and varieties of dried beans

A Practical Guide to Supporting People with Epilepsy Rebecca Case, Sinead Blake, 2020-05-08 This book is a practical guide with rationale to supporting people with epilepsy It encompasses epilepsy guidance such as NICE 2012 revised 2019 The Equality Act 2010 the children and families act 2014 current evidence based practice and regulatory organisation standards It is predominantly aimed at nurses and student nurses especially those studying learning disability nursing but also residential respite and supported living services schools and family carers to enable them to offer appropriate and evidence based support to people with epilepsy of all ages It is estimated there are approximately 1200 epilepsy related deaths each year in the UK Many of these are considered to be preventable High profile cases have led to an increase in anxiety in people providing services and greater scrutiny of those services by regulatory bodies Over the years

the authors have been asked the same questions and witnessed the same misunderstandings and mistakes by people supporting individuals with epilepsy So they looked at the common themes and the resources available It became clear that the information to address these gaps is available but not easily accessible There is lots of information in the public domain however much of it is factual rather than practical This book provides practical information and resources with the focus on what needs to happen how to make it happen and who needs to do it This book is useful for supporting people with epilepsy wherever they live both within and outside the United Kingdom

**The Pastry Chef Handbook** Pierre Paul Zeiher, Jean Michel Truchelut, 2022-11-15 From culinary instructors Pierre Paul Zeiher and Jean Michel Truchelut all the information guidance and recipes you need to become a pastry professional in a single book Comprehensive in its content and practical in its approach The Pastry Chef Handbook addresses all the steps necessary for this demanding and fascinating profession In addition to the examples illustrated by step by step visuals and essential cultural elements the book covers nutrition hygiene service and presentation Beginner pastry chefs will be able to learn the basic rules and 100 preparation techniques from making custard in a bain marie to icing There are also 100 detailed classical recipes ranging from Saint Honor to opera cakes And with the QR codes integrated throughout the book readers will be able to consult professional videos to perfect their know how on the companion BPI Campus site Recipes include Almond flavored savoy sponge Coffee clairs Paris Brest hazelnut praline cake Millefeuilles Cr me br l e Chocolate souffl

Technology Guide Hans-Jörg Bullinger, 2009-05-10 Use this technology guide to find descriptions of today s most essential global technologies Clearly structured and simply explained the book s reference format invites even the casual reader to explore the stimulating innovative ideas it contains

**Energy Management and Conservation Handbook** Frank Kreith, D. Yogi Goswami, 2007-07-06 While researchers work overtime to create new technologies and methods of providing energy it is critical that modern industry makes the most efficient use of the energy that is currently available The Energy Management and Conservation Handbook offers expert guidance on the planning and design of green technologies It focuses on management strategies for better utilization of energy in buildings and industry as well as ways of improving energy efficiency at the end use Renowned authorities from around the globe share insights and modern points of view on a broad spectrum of topics Summarizing proven energy efficient technologies in the building sector the book includes examples that highlight the cost effectiveness of some of these technologies It introduces basic methods for designing and sizing cost effective systems and determining whether it is economically efficient to invest in specific energy efficiency or renewable energy projects It provides guidance for computing measures of economic performance for relatively simple investment choices and the fundamentals for dealing with complex investment decisions The book also describes energy audit producers commonly used to improve the energy efficiency of residential and commercial buildings as well as industrial facilities After developing the basics of HVAC control the book explores operational needs for successfully maintained operations It describes the essentials of control systems for heating

ventilating and air conditioning of buildings designed for energy conserving operation The book also defines demand side management covers its role in integrated resource planning and delineates the main elements of its programs The book demonstrates these concepts with case studies of successful demand side management programs These features and more provide the tools necessary to improve energy management leading to higher energy efficiencies Efficient Use and Conservation of Energy - Volume I Clark W. Gellings, 2009-06-10 Efficient Use and Conservation of Energy is a component of Encyclopedia of Energy Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty Encyclopedias The volume on Efficient Use and Conservation Of Energy discusses matters of great relevance to our world such as Efficient Use and Conservation of Energy in the Industrial Sector Efficient Use and Conservation of Energy in Buildings Efficient Use and Conservation of Energy in the Transportation Sector Efficient Use and Conservation of Energy in the Agricultural Sector Using Demand Side Management to Select Energy Efficient Technologies and Programs These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs Building Energy Management Systems and Techniques Fengji Luo, Gianluca Ranzi, Zhao Yang Dong, 2024-02-21 Building Energy Management Systems and Techniques Principles Methods and Modelling presents basic concepts methodologies modeling techniques and fundamental design schemes of building energy management systems Covering the latest developments and methodologies from academia and industry the book brings together energy management demand response evolutionary computation and fundamental programming The authors explore the basic concepts related to building energy management systems and put them into the context of smart grids demand response and demand side management internet of things and distributed renewable energy Advanced topics provide the reader with an understanding of various energy management scenarios and procedures for modern buildings in an automatic and highly renewable penetrated building environment This includes a range of energy management techniques for building side energy resources such as battery energy storage systems plug in appliances and HVAC systems The fundamental principles of evolutionary computation are covered and applied to building energy management problems The authors also introduce the paradigm of occupant to grid integration and its implementation through personalized recommendation technology to guide the occupants choices on energy related products and their energy usage behaviors as well as to enhance the energy efficiency of buildings The book includes several application examples throughout illustrating for the reader the key aspects involved in the implementation of building energy management schemes Building Energy Management Systems and Techniques is an invaluable resource for undergraduate and postgraduate students enrolled in courses related to energy efficient building systems and smart grids and researchers working in the fields of smart grids smart buildings homes and energy demand response The book will be of use to professional electrical civil computing and communications engineers

architects and building energy consultants Integrates the latest techniques in the building energy management paradigm such as appliance scheduling peer to peer energy trading and occupant to grid integration Provides extensive application examples to help readers understand the design principles of different building energy management systems Includes step by step guidance on the methods modeling techniques and applications presented in the book including evolutionary computations Provides pseudocodes and optimization algorithms for the application examples to enable the reader to gain insight into the modeling details [Resources in Education](#) ,1991      **The "I Love My Rice Cooker" Recipe Book** Adams Media,2018-01-16 Learn how to get the most out of using a rice cooker in this go to guide with 175 recipes for cooking nearly everything from soups and appetizers to meats veggies pasta and even dessert Rice cookers are a great way to perfectly cook rice but they re also great for cooking just about everything else These popular kitchen appliances can steam stew stir fry braise and saut almost like a portable stovetop In The I Love My Rice Cooker Recipe Book you ll learn how to use your rice cooker to create 175 delicious one pot meals that are healthy and easy to make using fresh ingredients and basic pantry items With detailed explanations of the techniques and processes you can use this cookbook will empower you to use your rice cooker in news ways to create your favorite dishes
