Critical Disability Theory Dianne Pothier, Richard Devlin, 2011-11-01 People with disabilities in Canada inhabit a system of deep structural economic social political legal and cultural inequality a regime of dis citizenship Despite the widespread belief that Canada is a country of liberty equality and inclusiveness many persons with disabilities experience social exclusion and marginalization They are socially constructed as second class citizens Conventional understandings of disability are dependent on assumptions that characterize disability as misfortune and by implication privilege the normal over the abnormal Consequently it is presumed that societal organization based upon able bodied and minded norms is inevitable and that the best we can do is show sympathy or pity The essays *Critical Disability Theory* contend instead that achieving equality for the disabled is not fundamentally a question of medicine or health nor is it an issue of sensitivity or compassion Rather it is a question of politics and of power and powerlessness This book argues that we need new ways to think about the nature of disability a new understanding of participatory citizenship that encompasses the disabled new policies to respond to their needs and a new vision of their entitlements Twenty four scholars from a variety of disciplines come together here to identify the problems with traditional approaches to disability and to provide new directions The essays range from focused empirical and experiential studies of different disabilities to policy analyses legal interrogations and philosophical reconsiderations The result will be of interest to policy makers professionals academics non governmental organizations and grassroots activists
