Reflections: Discovering Life in the Universe

Descriptions: This questionnaire is designed as a guide checklist of whether a student has actually mastered the performance-ideas for this chapter. It should be noted if they have. Keep in mind that these items refer to a *task* associated to selected topics from the chapter, intended to give insight that will lead to more in-depth study.

1. The gas particles inside a lower balloon, causing it to expand, until it reaches a new larger size.

Using that model of the balloon should not depend on size, the gas particles should still move faster. Thus, think about what would happen if the gas in the balloon were hot enough for the particles to move so fast that they would leave the balloon. That's what would happen if the gas in the balloon were hot enough for the particles to move so fast that they would leave the balloon. That's what would happen if the gas in the balloon were hot enough for the particles to move so fast that they would leave the balloon.
