

Guided Math Lesson: Unit 3 Day 9

ESSENTIAL QUESTION:

How can patterns in numbers help us to better understand and solve problems?

LESSON OBJECTIVE:

We will explore number relationships through properties of addition and subtraction.

ADDING THREE DIGITS

Today we will use math tools to help us add three numbers together. We always want to make ten if we can because ten is an easy number for us to count on. We will use a twenty frame to help us add three numbers. Draw three numbers. Can you find two numbers that equal ten? Let's add them to our twenty frame together. Now we will add the last number to our ten. Show me how we count up from ten. How many do we have altogether? Help me write a number sentence to match our math. (repeat 3-5 times)

LESSON DISCUSSION QUESTIONS

What patterns can we find when we use a twenty frame (counting by 5s, tens, 2s)?
How can you tell if two numbers equal ten?
Tell us how you got that answer.
Did anyone find a different way?

MATERIALS:

Use a large class size 20 frame on butcher paper and/or give students the twenty frame and small manipulatives to work with.

SMALL GROUP LESSON

Students spin a spinner 3 times and each time add manipulatives to their 20 frame. Students see if they can make ten. Then count up from ten once they have the three numbers on the twenty frame.

REMEDIATE

Both students and teacher work together to spin and add. Use the remediate spinners.

ON LEVEL

After modeling how complete the concept, students apply the concept using the on level spinners.

ENRICH

After modeling how to complete the concept, the students work using the enrich spinners.
