Viktoria H S E Robertson, 2020-02-06 In recent years market definition has come under attack as an analytical tool of
competition law Scholars have increasingly questioned its usefulness and feasibility That criticism comes into sharper relief
in dynamic innovation driven markets which do not correspond to the static markets on which the concept of the relevant
market was modelled This book explores that controversy from a comparative legal perspective taking into account both EU
competition and US antitrust law It examines the manifold ways in which courts and competition authorities in the EU and
US have factored innovation related considerations into market delineation covering innovative product markets product
differentiation future markets issues going beyond market definition proper such as innovation competition innovation
markets and potential competition intellectual property rights innovative aftermarkets and multi sided platforms This book
finds that going forward the role of market definition in dynamic contexts needs to focus on its function of market
characterisation rather than on the assessment of market power Surveyor and Municipal and County Engineer, 1969
