- Place the generator at level 1 in the CG, away from buildings or other equipment when operating the generator.
- Operate the generator for a few minutes at the generator in the 1. Fuel gauges may read 0.
- Conduct gas sampling procedures earlier in operation. Move out the generator to more distant level. Be sure to provide adequate ventilation.
- Continue to check the generator controls and understand operation of all the controls. Never touch anyone or operate the generator without an air hose/breathing.
- Keep clear and do not walk into the generator when it is operating.
- Keep clear from rotating parts when the generator is running.
- The generator is a portable source of electrical energy when connected to the power grid and should:
- do not generate too much current to cause a short and do not go to the max.
