

IEEE Conference Publication Program Quick Reference

IEEE's Conference Publications Program (CPP) facilitates the acquisition of conference proceedings and post-conference distribution of content. [IEEE Meetings, Conferences & Events \(MCE\)](#) can help you navigate the process. You can also find courses in the [IEEE Center for Leadership Excellence](#). Below find a quick guide outlining the CPP process.

Submit the IEEE Publication Form

The Conference Chair submits the [IEEE Conference Publication Form](#) to request approval to submit your conference papers to the CPP and the IEEE Xplore® Digital Library at least 12 months before the conference.

Accept the Letter of Acquisition (LOA)

The Conference Publications Chair electronically accepts and approves the emailed [Letter of Acquisition \(LOA\)](#), containing the conference publication's cataloging information, information to conference authors, and instructions for preparing the publication for IEEE. All IEEE publications are subject to the rules outlined in the [IEEE Publication Services and Products Board \(PSBP\) Operations Manual](#).

Phase 1: Collect & Assemble your Publication

Now that you have accepted your LOA, it's time to establish your [paper submission process](#).

- Establish your [Call for Papers](#) and get the word out through [e-Notice](#) and other channels.
- Plan your [peer review process and criteria](#), identify [plagiarism-checking tools](#), and select reviewers.
- [Hire a publication vendor](#).
- [Notify accepted authors with instructions](#) for preparing and submitting final papers for distribution ([templates](#), [Electronic Copyright Form \(eCF\) submission](#)).

Phase 2: Produce & Submit your Publication

When all final papers are received, begin [production on your conference publication](#).

- Consider preparing an on-site conference proceedings and a version for IEEE Xplore®.
- To prepare your materials, consider [PDF eXpress](#) and use the [Packing List Generator Tool](#).
- Collect [transfer of copyright](#) from conference authors who wish to publish with IEEE.

Submit Your Papers to IEEE

- Upload one copy of your conference proceedings content (including the on-site proceedings) to the [IEEE Conference Publication Electronic Submission platform](#).
- Use this [checklist](#) to ensure your submission is IEEE Xplore®-compliant.
- Download the [Packing List Generator Tool](#) to prepare your submission.
- Always use the [IEEE Packing List Checker](#) to validate the packing list prior to submission and anytime a change is made to the packing list.
- Submit your IEEE Xplore®-compliant submission AND a copy of the content distributed to attendees.

Distribute and Index Your Proceedings

- Consider using your conference mobile app or a secure website to distribute the conference proceeding to attendees. (Tips: Only make content available to registrants for the duration of the conference, implement password protection, and ensure content correctly features LOA copyright notifications.)
- Your conference proceedings will be available to many [Abstracting & Indexing \(A&I\) organizations](#), which collect and share metadata from IEEE Xplore®.

Arguments that Count Rebecca Slayton, 2023-10-31 How differing assessments of risk by physicists and computer scientists have influenced public debate over nuclear defense In a rapidly changing world we rely upon experts to assess the promise and risks of new technology But how do these experts make sense of a highly

uncertain future In *Arguments that Count* Rebecca Slayton offers an important new perspective Drawing on new historical documents and interviews as well as perspectives in science and technology studies she provides an original account of how scientists came to terms with the unprecedented threat of nuclear armed intercontinental ballistic missiles ICBMs She compares how two different professional communities physicists and computer scientists constructed arguments about the risks of missile defense and how these arguments changed over time Slayton shows that our understanding of technological risks is shaped by disciplinary repertoires the codified knowledge and mathematical rules that experts use to frame new challenges And significantly a new repertoire can bring long neglected risks into clear view In the 1950s scientists recognized that high speed computers would be needed to cope with the unprecedented speed of ICBMs But the nation s elite science advisors had no way to analyze the risks of computers so used physics to assess what they could radar and missile performance Only decades later after establishing computing as a science were advisors able to analyze authoritatively the risks associated with complex software most notably the risk of a catastrophic failure As we continue to confront new threats including that of cyber attack Slayton offers valuable insight into how different kinds of expertise can limit or expand our capacity to address novel technological risks Intelligent Automation and Systems Engineering
