**Fireground Strategies, 3rd Edition** Anthony Avillo, 2015-10-28 The third edition of Chief Anthony Avillo's bestselling Fireground Strategies is an invaluable resource for the education and development of outstanding fire officers. Through case studies and illustrative examples, Avillo covers how to identify a strategy, develop an action plan, and implement tactics to meet the objectives of the course of action on a fireground. Fireground Strategies is a required text in senior-level undergraduate firefighting strategies courses and is recommended reading for promotional exams across the United States. New to the third edition: Expanded incident command chapters covering all aspects of fireground control; Street-level strategies focusing on the modern fire environment; Improved section on resource management and additional alarm guidelines; Retooled strategic and tactical activities to integrate the latest attack and ventilation research; Revamped operational safety chapter including department-level safety programs and mechanisms designed to support and foster a culture of safety; New case studies designed to drive home main points including lessons learned; Strategic considerations of solar panels; Comprehensive guidelines on Buildings that Change the Rules of the Game; Updated vent-enter-isolate search; VEIS information; Expanded section on risk management and who, what, where vs. LUNAR; Improved operational suggestions for high-rise operations.

**Fireground Strategies, 4th edition** Anthony Avillo, 2024-12-10 Discover the 4th Edition of Chief Anthony Avillo's Fireground Strategies, the ultimate guide for fire officers mastering firefighting strategy. Updated with relevant insights, case studies, and tactics, it's essential for undergraduate courses, promotional exams, and professional growth.

**Egress Design Solutions** Jeffrey Tubbs, Brian Meacham, 2007-05-01 The architect's primary source for information on designing for egress, evacuation, and life safety. Egress Design Solutions: Emergency Evacuation and Crowd Management Planning is written by proven experts on egress issues. Meacham and Tubbs are engineers with Arup, an international firm with a stellar reputation for quality design and engineering. Their book examines egress solutions in terms of both prescriptive and performance-based code issues. A portion of the book focuses on techniques for providing egress design solutions and for coordinating egress systems with other critical life safety systems. Another part reviews historic and recent tragic life loss fire events. As such, this is easily the most comprehensive take on the subject written especially for architects.

**Aligning IT and Business** Katarzyna Tworek, 2019-02-18 This book examines the interplay between IT solutions and specific management methods in organizations. In particular, it assesses the impact of IT reliability on factors like employees' commitment and organizational performance. After developing the necessary theoretical foundation, the book presents a framework for aligning IT solutions with a number of specific management methods in organizations. In addition, it demonstrates the extent to which IT reliability can be an indicator for this alignment and discusses the impact on employees' commitment and organizational performance under various management methods. Case studies from organizations in Switzerland and Poland help to illustrate the findings. In closing, the book presents roadmaps for improving IT and business.

alignment so as to achieve higher commitment and better results

### **Understanding Information Retrieval Systems**

Marcia J. Bates, 2011-12-20 In order to be effective for their users information retrieval IR systems should be adapted to the specific needs of particular environments The huge and growing array of types of information retrieval systems in use today is on display in Understanding Information Retrieval Systems Management Types and Standards which addresses over 20 types of IR systems These various system types in turn present both technical and management challenges which are also addressed in this volume In order to be interoperable in a networked environment IR systems must be able to use various types of technical standards a number of which are described in this book often by their original developers The book covers the full context of operational IR systems addressing not only the systems themselves but also human user search behaviors user centered design and management and policy issues In addition to theory and practice of IR system design the book covers Web standards and protocols the Semantic Web XML information retrieval Web social mining search engine optimization specialized museum and library online access records compliance and risk management information storage technology geographic information systems and data transmission protocols Emphasis is given to information systems that operate on relatively unstructured data such as text images and music The book is organized into four parts Part I supplies a broad level introduction to information systems and information retrieval systems Part II examines key management issues and elaborates on the decision process around likely information system solutions Part III illustrates the range of information retrieval systems in use today discussing the technical operational and administrative issues for each type Part IV discusses the most important organizational and technical standards needed for successful information retrieval This volume brings together authoritative articles on the different types of information systems and how to manage real world demands such as digital asset management network management digital content licensing data quality and information system failures It explains how to design systems to address human characteristics and considers key policy and ethical issues such as piracy and preservation Focusing on web based systems the chapters in this book provide an excellent starting point for developing and managing your own IR systems

### **eWork and eBusiness in Architecture, Engineering and Construction**

Jan Karlshoj, Raimar Scherer, 2018-09-03 eWork and eBusiness in Architecture Engineering and Construction 2018 collects the papers presented at the 12th European Conference on Product and Process Modelling ECPPM 2018 Copenhagen 12 14 September 2018 The contributions cover complementary thematic areas that hold great promise towards the advancement of research and technological development in the modelling of complex engineering systems encompassing a substantial number of high quality contributions on a large spectrum of topics pertaining to ICT deployment instances in AEC FM including Information and Knowledge Management Construction Management Description Logics and Ontology Application in AEC Risk Management 5D nD Modelling Simulation and Augmented Reality Infrastructure Condition Assessment Standardization of Data Structures Regulatory and Legal Aspects Multi Model and distributed Data Management System

Identification Industrialized Production Smart Products and Services Interoperability Smart Cities Sustainable Buildings and Urban Environments Collaboration and Teamwork BIM Implementation and Deployment Building Performance Simulation Intelligent Catalogues and Services eWork and eBusiness in Architecture Engineering and Construction 2018 represents a rich and comprehensive resource for academics and researchers working in the interdisciplinary areas of information technology applications in architecture engineering and construction In the last two decades the biennial ECPPM European Conference on Product and Process Modelling conference series as the oldest BIM conference has provided a unique platform for the presentation and discussion of the most recent advances with regard to the ICT Information and Communication Technology applications in the AEC FM Architecture Engineering Construction and Facilities Management domains

**Fireground Strategies** Anthony Aivillo, 2008 Fireground Strategies 2nd Edition covers fireground organization and operational safety as well as building construction and choosing a strategic mode of operation from the point of view of those in command of both the fireground and individual companies In addition specific occupancy types are explored in regard to command and firefighting concerns as well as life safety concerns Used in conjunction with the Scenarios Workbook Fireground Strategies 2nd Edition provides a comprehensive guide to organizing the fireground and maintaining control

Forthcoming Books Rose Army, 2003-04 STAIRS 2014 U. Endriss, J. Leite, 2014-08 Artificial Intelligence is a field which continues to expand and develop rapidly and so it is also one in which original ideas and fresh perspectives are of particular interest The Starting AI Researcher Symposium STAIRS is an international meeting which supports Ph D students and those who have held a Ph D for less than one year from all over the world at the start of their career The symposium offers doctoral students and young postdoctoral AI fellows the chance to experience delivering a presentation of their work in a supportive environment This book presents papers from the Seventh STAIRS a satellite event of the 21st European Conference on Artificial Intelligence ECAI held in Prague Czech Republic in August 2014 The book includes 30 papers accepted for presentation at the conference out of 45 submissions 16 papers were selected for an oral presentation at the symposium while the other 14 were presented at a poster session Together these papers cover the field of AI knowledge representation and reasoning machine learning planning and scheduling being the areas which have attracted the largest number of submissions The book provides a fascinating preview of the current work of future AI researchers and will be of interest to all those whose work involves the use of artificial intelligence and intelligent systems

*Advances in Knowledge-based and Intelligent Information and*

*Engineering Systems* Manuel Graña, 2012 In this 2012 edition of *Advances in Knowledge Based and Intelligent Information and Engineering Systems* the latest innovations and advances in Intelligent Systems and related areas are presented by leading experts from all over the world The 228 papers that are included cover a wide range of topics One emphasis is on Information Processing which has become a pervasive phenomenon in our civilization While the majority of Information Processing is becoming intelligent in a very broad sense major research in Semantics Artificial Intelligence and Knowledge Engineering supports the domain specific applications that are becoming more and more present in our everyday living Ontologies play a major role in the development of Knowledge Engineering in various domains from Semantic Web down to the design of specific Decision Support Systems Research on Ontologies and their applications is a highly active front of current Computational Intelligence science that is addressed here Other subjects in this volume are modern Machine Learning Lattice Computing and Mathematical Morphology The wide scope and high quality of these contributions clearly show that knowledge engineering is a continuous living and evolving set of technologies aimed at improving the design and understanding of systems and their relations with humans

STAIRS 2012 Kristian Kersting, Marc Toussaint, 2012 The field of Artificial Intelligence is one in which novel ideas and new and original perspectives are of more than usual importance The Starting AI Researchers Symposium STAIRS is an international meeting which supports AI researchers from all countries at the beginning of their career PhD students and those who have held a PhD for less than one year It offers doctoral students and young post doctoral AI fellows a unique and valuable opportunity to gain experience in presenting their work in a supportive scientific environment where they can obtain constructive feedback on the technical content of their work as well as advice on how to present it and where they can also establish contacts with the broader European AI research community This book presents revised versions of peer reviewed papers presented at the Sixth STAIRS which took place in Montpellier France in conjunction with the 20th European Conference on Artificial Intelligence ECAI and the Seventh Conference on Prestigious Applications of Intelligent Systems PAIS in August 2012 The topics covered in the book range over a broad spectrum of subjects in the field of AI machine learning and data mining constraint satisfaction problems and belief propagation logic and reasoning dialogue and multiagent systems and games and planning Offering a fascinating opportunity to glimpse the current work of the AI researchers of the future this book will be of interest to anyone whose work involves the use of artificial intelligence and intelligent systems

Current Information in the Construction Industry, 1974

**STAIRS 2016** D. Pearce, H.S. Pinto, 2016-08-23 As a vibrant area of computer science which continues to develop rapidly AI is a field in which fresh ideas and new perspectives are of particular interest This book presents the proceedings of the 8th European Starting AI Researcher Symposium STAIRS 2016 held as a satellite event of the 22nd European Conference on Artificial Intelligence ECAI in The Hague the Netherlands in August 2016 What is unique about the STAIRS symposium is that the principal author of every submitted paper must be a young researcher who either does not yet hold a Ph D or who

has obtained their Ph D during the year before the submission deadline for papers The book contains 21 accepted papers Part I includes the 11 long papers which were presented orally at the symposium and Part II the remaining long and short papers presented in poster sessions These papers cover the entire field of AI with social intelligence and socio cognitive systems machine learning and data mining autonomous agents and multiagent systems being the areas which attracted the largest number of submissions There is a good balance between foundational issues and AI applications and the problems tackled range widely from classical AI themes such as planning and scheduling or natural language processing to questions related to decision theory and games as well as to other newly emerging areas Providing a tantalizing glimpse of the work of AI researchers of the future the book will be of interest to all those wishing to keep abreast of this exciting and fascinating field

**Building Systems for Interior Designers** Corky Binggeli, 2010 Written in a straightforward nontechnical style that maintains depth and accuracy this landmark reference is the first text on building systems for interior designers From heating and cooling systems water and waste electricity lighting interior transportation and communication systems all of the mechanical and electrical systems that interior designers need to know are covered in a clear and accessible way The technical knowledge and vocabulary presented here allow interior designers to communicate more effectively with architects engineers and contractors while collaborating on projects leading to more accurate solutions for problems related to a broad range of other building considerations with an impact on interior design New to this edition are chapters on structural systems and building components and how they are integrated with the other systems Illustrated with over 100 photographs and drawings new to this edition Building Systems for Interior Designers is sure to be constantly at the fingertips of designers

Zomaya, 2012-08-14 Today's highly parameterized large scale distributed computing systems may be composed of a large number of various components computers databases etc and must provide a wide range of services The users of such systems located at different geographical or managerial network cluster may have a limited access to the system's services and resources and different often conflicting expectations and requirements Moreover the information and data processed in such dynamic environments may be incomplete imprecise fragmentary and overloading All of the above mentioned issues require some intelligent scalable methodologies for the management of the whole complex structure which unfortunately may increase the energy consumption of such systems An optimal energy utilization has reached to a point that many information technology IT managers and corporate executives are all up in arms to identify scalable solution that can reduce electricity consumption so that the total cost of operation is minimized of their respective large scale computing systems and simultaneously improve upon or maintain the current throughput of the system This book in its eight chapters addresses the fundamental issues related to the energy usage and the optimal low cost system design in high performance green computing systems The recent evolutionary and general metaheuristic based solutions for energy optimization in data processing scheduling resource allocation and communication in modern computational grids cloud and network computing are presented along with several important conventional technologies to cover the hot topics from the fundamental theory of the green computing concept and to describe the basic architectures of systems This book points out the potential application areas and provides detailed examples of application case studies in low energy computational systems The development trends and open research issues are also outlined All of those technologies have formed the foundation for the green computing that we know of today      *The Globe encyclopaedia of universal information*, ed. by J.M.
