Parallel Computing Architectures and APIs Vivek Kale, 2019-12-06 Parallel Computing Architectures and APIs IoT Big Data Stream Processing commences from the point high performance uniprocessors were becoming increasingly complex expensive and power hungry A basic trade off exists between the use of one or a small number of such complex processors at one extreme and a moderate to very large number of simpler processors at the other When combined with a high bandwidth interprocessor communication facility leads to significant simplification of the design process However two major roadblocks prevent the widespread adoption of such moderately to massively parallel architectures the interprocessor communication bottleneck and the difficulty and high cost of algorithm software development One of the most important reasons for studying parallel computing architectures is to learn how to extract the best performance from parallel systems Specifically you must understand its architectures so that you will be able to exploit those architectures during programming via the standardized APIs This book would be useful for analysts designers and developers of high throughput computing systems essential for big data stream processing emanating from IoT driven cyber physical systems CPS This pragmatic book Devolves uniprocessors in terms of a ladder of abstractions to ascertain say performance characteristics at a particular level of abstraction Explains limitations of uniprocessor high performance because of Moore s Law Introduces basics of processors networks and distributed systems Explains characteristics of parallel systems parallel computing models and parallel algorithms Explains the three primary categorical representatives of parallel computing architectures namely shared memory message passing and stream processing Introduces the three primary categorical representatives of parallel programming APIs namely OpenMP MPI and CUDA Provides an overview of Internet of Things IoT wireless sensor networks WSN sensor data processing Big Data and stream processing Provides introduction to 5G communications Edge and Fog computing Parallel Computing Architectures and APIs IoT Big Data Stream Processing discusses stream processing that enables the gathering processing and analysis of high volume heterogeneous continuous Internet of Things IoT big data streams to extract insights and actionable results in real

time Application domains requiring data stream management include military homeland security sensor networks financial applications network management web site performance tracking real time credit card fraud detection etc

Working Around Disruptions of Network Infrastructures Amro Al-Akkad, 2016-02-22 As in disasters the availability of information and communication technology services can be severely disrupted the author explores challenges and opportunities to work around such disruptions He therefore empirically analyzes how people in disasters use remnants of technology to still communicate their needs Based on this he suggests quality attributes whose implementation can support the resilience in technology To exemplify this he develops iteratively two mobile ad hoc systems and explores their feasibility and implications for emergency response under close to real conditions Compared to the state of the art both systems are independent from preexisting network infrastructure and run on off the shelf smartphones

Wireless Personal Communications Mohsen A. M. El-Bendary, 2018-03-24 This book introduces wireless personal communications from the point of view of wireless communication system researchers Existing sources on wireless communications put more emphasis on simulation and fundamental principles of how to build a study model In this volume the aim is to pass on to readers as much knowledge as is essential for completing model building of wireless communications focusing on wireless personal area networks WPANs This book is the first of its kind that gives step by step details on how to build the WPANs simulation model It is most helpful for readers to get a clear picture of the whole wireless simulation model by being presented with many study models The book is also the first treatise on wireless communication that gives a comprehensive introduction to data length complexity and the computational complexity of the processed data and the error control schemes This volume is useful for all academic and technical staff in the fields of telecommunications and wireless communications as it presents many scenarios for enhancing techniques for weak error control performance and other scenarios for complexity reduction of the wireless data and image transmission Many examples are given to help readers to understand the material covered in the book Additional resources such as the MATLAB codes for some of the examples also are presented
