surrounding such cars will be fully realized What were once considered race only modifications can now be civilized for street use and Magnante carefully reviews all of the relevant points for optimal appearance performance and safety

*Practical Engine Airflow* John Baechtel, 2015-12-15 The efficient flow of air through an engine is instrumental for producing maximum power To maximize performance engine builders seek to understand how air flows through components and ultimately through the entire engine Engine builders use this knowledge and apply specific practices and principles to unlock horsepower within an engine this applies to all engine types including V 8s V 6s and imported 4 cylinder engines Former Hot Rod magazine editor and founder of Westech Performance Group John Baechtel explains airflow dynamics through an engine in layman s terms so you can easily absorb it and apply it The principles of airflow are explained specifically the physics of air and how it flows through major engine components including the intake heads cylinders and exhaust system The most efficient and least restricted path through an engine is the key to high performance To get to this higher level the author explains atmospheric pressure air density and brake specific fuel consumption so you understand the properties of fuel for tuning Baechtel covers the primary factors for optimizing the airflow path This includes the fundamentals of air motion air velocity and boundary layers obstructions and pressure changes Flowing air through the heads and the combustion chamber is key and is comprehensively explained Also comprehensively explored is the exhaust system s airflow in particular primary tube size and length collector function and scavenging Chapters also include flowbench testing evaluating flow numbers and using airflow software In the simplest terms an engine is an air pump Whether you re a professional engine builder or a serious amateur engine builder you must understand engine airflow dynamics and must apply these principles if you want to optimize performance If you want to achieve ultimate engine performance you need this book

*How to Build Max-Performance Hemi Engines* Richard Nedbal, 2009 How to Build Max Performance Chrysler Hemi Engines details how to extract even more horsepower out of these incredible engines All the block options from street versus race new to old iron versus aluminum are presented Full detailed coverage on the reciprocating assembly is also included Heads play an essential role in flowing fuel and producing maximum horsepower and therefore receive special treatment Author Richard Nedbal explores major head types rocker arm systems head machining and prep valves springs seats porting quench control and much more All the camshaft considerations are discussed as well so you can select the best specification for your engine build All the induction options are covered including EFI Aftermarket ignitions systems high performance oiling systems and cooling systems are also examined How to install and set up power adders such as nitrous oxide superchargers and turbochargers is also examined in detail

**Early Funny Cars** Lou Hart, 2022-04-15 Blast through the evolving early years of Funny Car drag racing when doorslammers morphed into flip top rail monsters The era features historic mounts from Arnie the Farmer Beswick Al the Flying Dutchman Vanderwoude Jungle Jim Liberman Don the Snake Prudhomme and many more The metamorphosis from doorslammers to fiberglass flip top

dragsters wasn't ever a cut and dry plan As drag racers pushed the envelope for more speed a series of innovations quickly evolved and refined the genre Funny Cars cut their teeth in the A Factory Experimental A FX and Experimental Stock X S classes in 1964 with the 2 percent Mopars that looked funny with their axles moved forward However it was Jack Chrisman's supercharged nitro fueled 427 Supercharged Factory Experimental S FX Comet Caliente that trailblazed the class on which the NHRA turned its back and the AHRA fully accepted Showmanship became the draw in the dawn of Funny Car with half track burnouts and flame throwing headers that packed fans five deep at the fence By 1969 the NHRA had no choice but to create a class for these nitro breathing flip top sporting rail bruisers indoctrinating the Funny Car F C class at the Winternationals with 40 cars vying for 16 places in the field The rest as they say is history *Design of Racing and High Performance Engines* Joseph Harralson, 1995-02-01 This book presents in a clear and easy to understand manner the basic principles involved in the design of high performance engines Editor Joseph Harralson first compiled this collection of papers for an internal combustion engine design course he teaches at the California State University of Sacramento Topics covered include engine friction and output design of high performance cylinder heads multi cylinder motorcycle racing engines valve timing and how it effects performance computer modeling of valve spring and valve train dynamics correlation between valve size and engine operating speed how flow bench testing is used to improve engine performance and lean combustion In addition two papers of historical interest are included detailing the design and development of the Ford D O H C competition engine and the coventry climax racing engine **How to Tune and Modify Engine Management Systems** Jeff

Hartman, 2004-02-13 Drawing on a wealth of knowledge and experience and a background of more than 1 000 magazine articles on the subject engine control expert Jeff Hartman explains everything from the basics of engine management to the building of complicated project cars Hartman has substantially updated the material from his 1993 MBI book Fuel Injection 0 879387 43 2 to address the incredible developments in automotive fuel injection technology from the past decade including the multitude of import cars that are the subject of so much hot rodding today Hartman's text is extremely detailed and logically arranged to help readers better understand this complex topic **Carburetors and Fuel Injection Systems**
