

## How to Make a Better Robot

by Persephone

Many people think that robots are a inevitable part of the future. It sounds pretty cool but does it seem like something that will really happen? Well, it does but it won't be everything that you see in the movies. While it may seem like something that will happen, there are many things that are not possible. For example, robots can't think, they can't feel, they can't move, they can't see, they can't hear, they can't taste, they can't smell, they can't feel pain, they can't feel pleasure, they can't feel love, they can't feel hate, they can't feel anything at all. They are just machines that do what they are programmed to do.

Robots are not like us, they are not alive, they are not thinking, they are not feeling, they are not anything at all. They are just machines that do what they are programmed to do. They are not like us, they are not alive, they are not thinking, they are not feeling, they are not anything at all. They are just machines that do what they are programmed to do. They are not like us, they are not alive, they are not thinking, they are not feeling, they are not anything at all. They are just machines that do what they are programmed to do.

## How to Design a Robot

A group of researchers at the University of California, Berkeley, have designed a robot that can think, feel, and move. The robot is called "Thea" and it is the first robot that can think, feel, and move. Thea is a small robot that is about the size of a human hand. It has a head, a torso, and two arms. It can move its head, its arms, and its body. It can also think and feel. Thea is a very special robot because it is the first robot that can think, feel, and move. It is a very important step in the development of robots.
