Official Gazette of the United States Patent and Trademark Office, 1989 Nanoscaled Semiconductor-on-Insulator Structures and Devices S. Hall, A.N. Nazarov, V.S. Lysenko, 2007-09-04 This proceedings volume constitutes an archive of the contributions of the key speakers who attended the NATO Advanced Research Workshop on Nanoscaled Semiconductor On Insulator Structures and devices held in the Tourist and Recreation Centre Sudak Crimea Ukraine from 15 to 19 October 2006 The semiconductor industry has sustained a very rapid growth during the last three decades through impressive technological developments which have resulted in products with higher performance and lower cost per function After many years of development it is now confidently predicted that semiconductor on insulator materials will enter and increasingly be used by manufacturing industry The wider use of semiconductor especially silicon on insulator materials will not only enable the benefits of these materials to be demonstrated but also will drive down the cost of substrates which in turn will stimulate the development of other novel devices and applications Thus the semiconductor on insulator materials of today are not only the basis for modern microelectronics but also for future nanoscale devices and ICs In itself this trend will encourage the promotion of the skills and ideas generated by researchers in the Former Soviet Union and Eastern Europe Indeed one of the goals of this Workshop is to promote the development of SOI technologies worldwide

The Intrinsic Bispectrum of the Cosmic Microwave Background Guido Walter Pettinari, 2015-08-27 Nominated as an outstanding thesis by Professor Robert Crittenden of the Institute of Cosmology and Gravitation in Portsmouth and winner of the Michael Penston Prize for 2014 given by the Royal Astronomical Society for the best doctoral thesis in Astronomy or Astrophysics this work aims to shed light on one of the most important probes of the early Universe the bispectrum of the cosmic microwave background The CMB bispectrum is a potential window on exciting new physics as it is sensitive to the non Gaussian features in the primordial fluctuations the same fluctuations that evolved into today's planets stars and galaxies However this invaluable information is potentially screened as not all of the observed non Gaussianity is of primordial origin Indeed a bispectrum arises even for perfectly Gaussian initial conditions due to non linear dynamics such as CMB photons scattering off free electrons and propagating in an inhomogeneous Universe Dr Pettinari introduces the reader to this intrinsic bispectrum in a pedagogic way

building up from the standard model of cosmology and from cosmological perturbation theory the tool cosmologists use to unravel the history of the cosmos In doing so he introduces SONG a new and efficient code for solving the second order Einstein and Boltzmann equations Next he moves on to answer the crucial question is the intrinsic bispectrum going to screen the primordial signal in the CMB Using SONG he computes the intrinsic bispectrum and shows how its contamination leads to a small bias in the estimates of primordial non Gaussianity a great news for the prospect of using CMB data to probe primordial non Gaussianity **Springer Handbook of Augmented Reality** Andrew Yeh Ching Nee, Soh Khim

Ong, 2023-01-01 The Springer Handbook of Augmented Reality presents a comprehensive and authoritative guide to augmented reality AR technology its numerous applications and its intersection with emerging technologies This book traces the history of AR from its early development discussing the fundamentals of AR and its associated science The handbook begins by presenting the development of AR over the last few years mentioning the key pioneers and important milestones It then moves to the fundamentals and principles of AR such as photogrammetry optics motion and objects tracking and marker based and marker less registration The book discusses both software toolkits and techniques and hardware related to AR before presenting the applications of AR This includes both end user applications like education and cultural heritage and professional applications within engineering fields medicine and architecture amongst others The book concludes with the convergence of AR with other emerging technologies such as Industrial Internet of Things and Digital Twins The handbook presents a comprehensive reference on AR technology from an academic industrial and commercial perspective making it an invaluable resource for audiences from a variety of backgrounds Official Gazette of the United States Patent and Trademark Office United States.
