Looking for Spinoza Antonio R. Damasio, 2003 Publisher Description **The Social Neuroscience of Empathy** Jean Decety, William Ickes, 2011-01-21 Cross disciplinary cutting edge work on human empathy from the perspectives of social cognitive developmental and clinical psychology and cognitive affective neuroscience In recent decades empathy research has blossomed into a vibrant and multidisciplinary field of study The social neuroscience approach to the subject is premised on the idea that studying empathy at multiple levels biological cognitive and social will lead to a more comprehensive understanding of how other people s thoughts and feelings can affect our own thoughts feelings and behavior In these cutting edge contributions leading advocates of the multilevel approach view empathy from the perspectives of social cognitive developmental and clinical psychology and cognitive affective neuroscience Chapters include a critical examination of the various definitions of the empathy construct surveys of major research traditions based on these differing views including empathy as emotional contagion as the projection of one s own thoughts and feelings and as a fundamental aspect of social development clinical and applied perspectives including psychotherapy and the study of empathy for other people s pain various neuroscience perspectives and discussions of empathy s evolutionary and neuroanatomical histories with a special focus on neuroanatomical continuities and differences across the phylogenetic spectrum The new discipline of social neuroscience bridges disciplines and levels of analysis In this volume the contributors state of the art investigations of empathy from a social neuroscience perspective vividly illustrate the potential benefits of such cross disciplinary integration Contributors C Daniel Batson James Blair Karina Blair Jerold D Bozarth Anne Buysse Susan F Butler Michael Carlin C Sue Carter Kenneth D Craig Mirella Dapretto Jean Decety Mathias Dekeyser Ap Dijksterhuis Robert Elliott Natalie D Eggum Nancy Eisenberg Norma Deitch Feshbach Seymour Feshbach Liesbet Goubert Leslie S Greenberg Elaine Hatfield James Harris William Ickes Claus Lamm Yen Chi Le Mia Leijssen Abigail Marsh Raymond S Nickerson Jennifer H Pfeifer Stephen W Porges Richard L Rapson Simone G Shamay Tsoory Rick B van Baaren Matthijs L van Leeuwen Andries van der Leij Jeanne C Watson **The Meaning of the Body** Mark Johnson, 2012-06-29 In *The Meaning of the Body* Mark Johnson continues his pioneering work on the exciting connections between cognitive science language and meaning first begun in the classic *Metaphors We Live By* Johnson uses recent research into infant psychology to show how the body generates meaning even before self consciousness has fully developed From there he turns to cognitive neuroscience to further explore the bodily origins of meaning thought and language and examines the many dimensions of meaning including images qualities emotions and metaphors that are all rooted in the body s physical encounters with the world Drawing on the psychology of art and pragmatist philosophy Johnson argues that all of these aspects of meaning making are fundamentally aesthetic He concludes that the arts are the culmination of human attempts to find meaning and that studying the aesthetic dimensions of our experience is crucial to unlocking meaning s bodily sources Throughout Johnson puts forth a bold new conception of the mind

rooted in the understanding that philosophy will matter to nonphilosophers only if it is built on a visceral connection to the world Mark Johnson demonstrates that the aesthetic and emotional aspects of meaning are fundamental central to conceptual meaning and reason and that the arts show meaning making in its fullest realization If you were raised with the idea that art and emotion were external to ideas and reason you must read this book It grounds philosophy in our most visceral experience George Lakoff author of Moral Politics

Motivational Immediacy in the Workplace Jonathan E. Taylor,2022-05-02 Learners are always motivated they just may not be motivated to learn the things you are wanting them to learn Motivational Immediacy refers to the moment by moment motivation of learners during a learning event This is in contrast to typical global views of motivation and while casting a much heavier burden on the instructor brings with it more deep meaningful and permanent learning Motivational Immediacy in the Workplace focuses not only on fostering learner engagement with a primary emphasis on the role of the instructor but also addresses the work and concerns of curriculum writers and training directors The author defines Motivational Immediacy as both a phenomenon and a practice and provides concrete steps for practical action Motivational Immediacy as a construct refers to a moment by moment feeling of motivation on the part of the learner to engage in the learning opportunity directly at hand As a practice it is the instructor s process of working to stay connected with individual learners and foster engagement consistently at every moment of the teaching activity The author addresses this idea from a learner centered

orientation making the case that understanding and empathizing with the learner's perceptions is the most effective way to promote efficient meaningful learning. The book will provide a comprehensive conceptualization of learning engagement and learning resistance. It begins with a substantial theoretical framework and then shifts to direct applications to practice in the workplace. Motivational Immediacy is multidisciplinary and draws from fields such as Adult Education, Workplace and Training, Development Psychology, Educational Psychology, Sociology, Cultural Anthropology, and Communications.

Jane on the Brain Wendy Jones, 2017-12-05. An Austen scholar and therapist reveals Jane Austen's intuitive ability to imbue her characters with hallmarks of social intelligence and how these beloved works of literature can further illuminate the mind-brain connection. Why is Jane Austen so phenomenally popular? Why do we read *Pride and Prejudice* again and again? Why do we delight in Emma's mischievous schemes? Why do we care that Anne Elliot of *Persuasion* suffers? We care because it is our biological destiny to be interested in people and their stories: the human brain is a social brain, and Austen's characters are so believable that for many of us they are not just imaginary beings but friends whom we know and love. And thanks to Austen's ability to capture the breadth and depth of human psychology so thoroughly, we feel that she empathizes with us. Humans have a profound need for empathy to know that we are not alone with our joys and sorrows. We see ourselves and others reflected in Austen's work. Social intelligence is one of the most highly developed human traits when compared with other animals. How did it evolve? Why is it so valuable? Wendy Jones explores the many facets of social intelligence and juxtaposes them with the Austen canon. Brilliantly original and insightful, this fusion of psychology, neuroscience, and literature provides a heightened understanding of one of our most beloved cultural institutions and our own minds.

Between Care and Justice Elena Pulcini, 2024-05-01. Elena Pulcini (1950-2021) was an internationally renowned philosopher of care who was at the forefront of thinking and creating a new ethical framework to respond efficaciously to problems that affect individuals at a global level. This translation of Pulcini's last work addresses perhaps the two fundamental questions for our times: namely, why care for others when we are not bound by personal relationships, and why commit to justice even when it does not personally affect us. By focusing on passions such as indignation, fear, compassion, resentment, and love, Pulcini offers an alternative ethical perspective in which justice and care intertwine to supplement and balance each other. Together, care and justice are proven capable of addressing the challenge of the other, distant in space, the outsider, the marginalized, and the migrant, and time-future generations. In the end, Pulcini proposes a form of moral education that nurtures and develops desirable moral sentiments for a more just world at the interpersonal, social, political, economic, and environmental levels, thereby providing an alternative social-global model to current individual-focused, rights-based, purely rationalist ethical systems.

Self and Emotional Life Adrian Johnston, Catherine Malabou, 2013-06-04. Adrian Johnston and Catherine Malabou defy theoretical humanities' deeply entrenched resistance to engagements with the life sciences. Rather than treat biology and its branches as hopelessly reductive and politically suspect, they view recent advances in neurobiology and its adjacent

scientific fields as providing crucial catalysts to a radical rethinking of subjectivity Merging three distinct disciplines European philosophy from Descartes to the present Freudian Lacanian psychoanalysis and affective neuroscience Johnston and Malabou triangulate the emotional life of affective subjects as conceptualized in philosophy and psychoanalysis with neuroscience Their experiments yield different outcomes Johnston finds psychoanalysis and neurobiology have the potential to enrich each other though affective neuroscience demands a reconsideration of whether affects can be unconscious Investigating this vexed issue has profound implications for theoretical and practical analysis as well as philosophical understandings of the emotions Malabou believes scientific explorations of the brain seriously problematize established notions of affective subjectivity in Continental philosophy and Freudian Lacanian analysis She confronts philosophy and psychoanalysis with something neither field has seriously considered the concept of wonder and the cold disturbing visage of those who have been affected by disease or injury such that they are no longer affected emotionally At stake in this exchange are some of philosophy s most important claims concerning the relationship between the subjective mind and the objective body the structures and dynamics of the unconscious dimensions of mental life the role emotion plays in making us human and the functional differences between philosophy and science
