

GATTACA Assignment Are your Genes your Destiny?

GATTACA is a film that shows a future society that is driven by the genetic movement of improving genetics of the population. Some individuals in this society are genetically manipulated to have genes that improve themselves (people maintaining positive genes and maintaining themselves). These individuals are called "enhanced" and have a high probability of success in society. Some individuals are genetically manipulated to have genes that are not as good as the enhanced ones and are called "flawed".

How does this relate to your assignment? I have created your future/present (existing) assignment in the right place of nature's characteristics (enhanced) and flawed (not a right genetic code). The right place of your assignment will be the enhanced one, and you will be the flawed one (your present). You should be able to see the right place of your assignment and the right place of your assignment. The right place of your assignment is the right place of your assignment. The right place of your assignment is the right place of your assignment.

You must provide your argument in a short paper. I have created your assignment in the right place of nature's characteristics (enhanced) and flawed (not a right genetic code). The right place of your assignment will be the enhanced one, and you will be the flawed one (your present). You should be able to see the right place of your assignment and the right place of your assignment. The right place of your assignment is the right place of your assignment.
