**Advanced Machining Processes of Metallic Materials** Wit Grzesik, 2008-01-22 Advanced Machining Processes of Metallic Materials updates our knowledge on the metal cutting processes in relation to theory and industrial practice. In particular, many topics reflect recent developments, e.g., modern tool materials, computational machining, computer simulation of various process phenomena, chip control, monitoring of the cutting state, progressive and hybrid machining operations, and generation and modelling of surface integrity. This book addresses the present state and future development of machining technologies. It provides a comprehensive description of metal cutting theory, experimental and modelling techniques, along with basic machining processes and their effective use in a wide range of manufacturing applications. Topics covered include fundamental physical phenomena and methods for their evaluation, available technology of machining processes for specific classes of materials, and surface integrity. The book also provides strategies for optimization techniques and assessment of machinability. Moreover, it describes topics not currently covered in other sources, such as high performance and multitasking, complete machining with a high potential for increasing productivity, and virtual and e machining. The research covered here has contributed to a more generalized vision of machining technology, including not only traditional manufacturing tasks but also new potential emerging applications, such as micro and nanotechnology. Many practical examples of modern machining technology are applicable for various technical engineering and scientific levels. Collects together 20 years of research in the field and related technical information. *May 2023 - Surplus Record Machinery & Equipment Directory* Tom Scanlan, 2023-05-01 SURPLUS RECORD is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 110 000 industrial assets since 1924, including metalworking and fabricating, machine tools, lathes, CNC equipment, machine centers, woodworking equipment, food equipment, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more.
